Abstracts

Teradata Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Teradata Corporation and its competitors. This provides our Clients with a clear understanding of Teradata Corporation position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Teradata Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Teradata Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Teradata Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Teradata Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Teradata Corporation business.

About Teradata Corporation

Teradata Corporation provides enterprise data warehousing solutions, including enterprise analytic technologies and services.

Data Warehousing Solutions

The company's data warehousing solutions are comprised of software, hardware, and related business consulting and support services. Data warehousing is the process of capturing, integrating, storing, managing, and analyzing data to answer business questions and make more informed, faster decisions.

Customers use the company's data warehousing software and hardware technologies and related services to acquire, aggregate, store and integrate data from multiple sources, including transaction and enterprise resource planning systems; manage and analyze these data through the Teradata database software and tools, data mining, master data management and other enterprise analytical applications, such as customer management, demand and supply chain management, enterprise risk management, and financial management; and integrate analytics-based decisions into operational processes.

The company's solutions allow customers to obtain an integrated view of their business (including customers, products, channels, financials, suppliers, partners, and services); and transform business data into useful, insightful and actionable business intelligence.

The company offers a new purpose-built Teradata Platform Family adding the Data Mart Appliance, the Data Warehouse Appliance, and the Extreme Data Appliance to the existing Active Enterprise Data Warehouse platform.

Active Enterprise Intelligence: Teradata extends the use of traditional data warehousing by integrating analytics into enterprise business processes through a solution known as Active Enterprise Intelligence, which reduces the time between obtaining information and acting on it.

Products

The company provides enterprise data warehousing solutions with an integrated business that includes professionals and technologies. Its products are optimized and integrated specifically for data warehousing, including the database and application software, hardware platform, and related consulting and support services.

Teradata Database Software: The company's software combined with massively parallel processing (MPP) architecture provides the foundation for ability to support and manage a range of mixed workloads and data warehousing functions. The company's Teradata database software delivers near real-time intelligence for its customers with capabilities and features, such as support of short-term operational and long-term strategic workloads (mixed workloads), the ability to handle various concurrent queries, and simplified system management, high system availability, event monitoring, and easy integration into the enterprise. The company also offers subscriptions that provide its customers with when-and-if-available upgrades and enhancements to its database software.

Teradata Platform: For the hardware component of its solutions, Teradata integrates and optimizes open systems hardware components with its value-added, fault-tolerant BYNET MPP interconnect. The company utilizes Intel XEON 32/64-bit servers, along with storage offerings, to provide transparent scalability. Its solutions perform in multiple operating environments, including UNIX, LINUX, and Microsoft Windows.

Teradata Logical Data Models: The company's enterprise industry logical data models (LDMs) are designed to be blueprints for designing an enterprise data warehouse that reflects business priorities tailored to the specific needs of a particular industry. Its

LDMs are licensed to its customers as a key component of its data warehousing solutions. The company also offers subscriptions that provide its customers with when-and-if-available upgrades and enhancements to its LDMs.

Teradata Analytic Applications and Tools: The company offers a suite of data access and management tools and applications that leverage enterprise intelligence to solve business problems. These tools and applications include: data mining, master data management, customer management, enterprise risk management, finance and performance management, demand and supply chain

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
