## **Abstracts**

Ternium Siderar Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Ternium Siderar and its competitors. This provides our Clients with a clear understanding of Ternium Siderar position in the [Metals and Mining](#) Industry.

The report contains detailed information about Ternium Siderar that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Ternium Siderar. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Ternium Siderar financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Ternium Siderar competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Ternium Siderar business.

## **About Ternium Siderar**

Siderar S.A.I.C. operates as a steel company in Argentina. The company manufactures hot rolled, cold rolled, hot dip galvanized, electrogalvanized, prepainted and tinplate steel sheet products. It has five manufacturing centres in the province of Buenos Aires (San Nicolas, Ensenada, Haedo, Florencio Varela, and Canning). The company has its own network of points of sale throughout Argentina.

### **Segments**

The company has three segments: Uncoated Steel Sheet products segment, Coated steel sheet products segment, and other segment.

The Uncoated Steel Sheet products segment includes cold and hot rolled sheet; Coated steel sheet products segment concentrates mainly galvanized, electrogalvanized, pre-painted, zincalume and tinplate; and the Other segment mainly includes slabs, pig-iron and overrolling.

### **Products and Services**

**Slabs:** The company produces continuous casting slabs, which meet the internal

cleanness and surface quality requirements for the rolling process and for the production of flat steel products for different applications, including Tinplate, HSLA, API tubes, and Drawing Steels.

**Hot Rolled Steel:** Siderar supplies hot rolled flat steel products that meet the requirements of different markets. Siderar produces various steel grades suitable for general uses, as well as for welded tubes, and for construction, automotive, and agricultural industry and others.

**Cold Rolled Steels:** The company supplies cold rolled steel products that are used by the construction industry, automotive industry, home appliances, electrical industry and others.

**Tinplate:** Siderar provides coated steel products with tin, applied by means of electrolytic process. It is mainly used for manufacturing packages and cans for different products, specially for food, aerosols and paints.

**Hot Dip Galvanized and Cincalum Steel:** The company produces corrosion resistant steel coated with cleanness Zinc (Galvanized) or with Aluminium 55%-Zinc 45% alloy (Cincalum), by the hot dip process, for the construction, automotive, and home appliances industries.

**Electrogalvanized Steel:** Siderar produces cold rolled steel coated with a thin Zinc layer applied by electro deposition, to increase corrosion resistance. These products are used by the automotive and home appliance industries.

**Prepainted Steel:** The company supplies prepainted products, coil coated on galvanized and electro galvanized steel substrates, for uses in the construction and home appliance industries.

**Rolled formed Steel:** Siderar supplies rolled formed steel starting from hot dip galvanized, cincalum and coil coated ones. These products are used for manufacturing of metallic roofing, panels, claddings and all types of pieces/products for the construction industry.

**Road Engineering Products:** The company supplies rolled formed pieces, manufactured with hot dip galvanized steel, for guard rail (semi-rigid highway security system) and corrugated pipes for sewers, drains and others similar uses.

## Investments in Other Companies

**Comesi San Luis S.A.I.C.:** The company holds a 99% equity interest in Comesi San Luis S.A.I.C. Comesi San Luis S.A.I.C. produces cold and/or hot-rolled plates, whether coated or not, shaped and/or skelped.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
