Abstracts

Tesco Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Tesco Corporation and its competitors. This provides our Clients with a clear understanding of Tesco Corporation position in the [Energy](#) Industry.

The report contains detailed information about Tesco Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Tesco Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Tesco Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tesco Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tesco Corporation business.

About Tesco Corporation

Tesco Corporation engages in the design, manufacture, and service delivery of technology based solutions for the upstream energy industry.

Segments

The company operates in four business segments: Top Drive; Tubular Services; CASING DRILLING; and Research and Engineering.

Top Drive Segment

The Top Drive segment comprises top drive sales, top drive rentals, and after-market sales and service. The segment sells equipment and provides services to drilling contractors and oil and gas operating companies worldwide. The company provides top drive rental services on a day-rate basis for land and offshore drilling rigs, and it provides after-market sales and service for its customers.

The company primarily manufactures top drives that are used in drilling operations to rotate the drill string while suspended from the derrick above the rig floor. It offers for sale a range of portable and permanently installed top drive products that includes both

hydraulically and electrically powered machines capable of delivering 400 to 1,350 horsepower, with a rated lifting capacity of 150 to 750 tons. With each top drive it sells, the company offers the services of top drive technicians who provide customers with training, installation, and support services.

The company offers six distinct model series of top drive systems, using hydraulic, permanent magnet alternating current (AC) and induction AC technology. It uses AC induction technology and late generation power electronics in its smaller horsepower systems, such as its EMI machines, allowing the end user to specify its preferred power electronics and motor combination and permitting the company to select components from a larger vendor base. EMI top drive units are available with 150 and 250 ton load path configurations. The company also developed its EXI system in response to market demands for a compact electric top drive system. The EXI system has a load path rating of 350 tons and generates 600 horsepower at the quill. The HXI is a new generation of its hydraulic HMI system, incorporating a suite of operational features. The HXI machine has a load path rating of 250 tons and has a 700 horsepower self-contained diesel driven hydraulic power unit.

In addition to its top drive sales, the company rents top drives on a day-rate basis for land and offshore drilling rigs. Its rental fleet offers a range of systems that can be installed in practically any mast configuration, including workover rigs. The company's fleet comprises principally hydraulically powered top drive systems, with power ratings of 460 to 1,350 horsepower and load path ratings of 150 to 750 tons, each equipped with its own independent diesel engine driven hydraulic power unit. This combination permits a level of portability and installation flexibility.

The company's top drive rental fleet is deployed worldwide to be available to customers on a timely basis. The geographic distribution of the 117-unit fleet as of December 31, 2009 included the following regions: the United States, South America, Mexico, the Asia Pacific, Canada, Russia, and the Middle East.

The company also provides after-market sales and services to its installed customer base around the globe. Its service offerings include the commissioning of new units and recertification of working units, including top drives, power units, and various other top drive product and component repairs. The company's field-experienced personnel are available for the rig up and installation of all units – both rentals and customer-owned units. Its personnel also provide onsite training and top drive supervision. In addition, technicians are available to perform ongoing maintenance contracts.

Tubular Services Segment

The Tubular Services business segment includes a suite of proprietary offerings, as well as conventional casing and tubing running services. The company's proprietary service offerings use certain components of its CASING DRILLING technology, in particular the patented Casing Drive System (CDS), to provide an automated method for running casing and reaming the casing into the hole. The CDS is a tool which facilitates running and

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
