The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tetra Tech Inc. business.

About Tetra Tech Inc.

Tetra Tech, Inc. provides consulting, engineering, program management, construction, and technical services focusing on resource management, infrastructure, and the environment. The company serves its clients by providing solutions to the needs for water, environmental, and energy services. Its services include applied science, research and technology, engineering, design, construction management, construction, operations and maintenance, and information technology.

Segments

In 2009, the company's reportable segments included environmental consulting services; technical support services; engineering and architecture services; and remediation and construction management.

ENVIRONMENTAL CONSULTING SERVICES (ECS)

ECS provides science and consulting services, and project management in the areas of water resources, groundwater services, watershed management, mining and geotechnical sciences, environmental management, and information technology and modeling consulting.

Surface Water: The company provides water resource services to commercial clients, including those in the aerospace, chemical, alternative energy, mining, petroleum, pharmaceutical, retail, and utility industries. It provides surface water services to state and local government agencies, particularly in the areas of watershed management, stormwater management, and combined sewer overflows.

Groundwater: The company's activities in the groundwater field include projects, such as evaluating the adequacy of water supplies, investigating and identifying the sources of chemical contamination, examining the contamination, analyzing the speed and direction of contamination migration, and designing and evaluating remedial alternatives. In addition, it conducts monitoring studies for the groundwater treatment and extraction wells.

Waste Management: The company provides various engineering and consulting services for hazardous waste contamination and remediation projects. In addition, it performs risk assessments to determine the probability of adverse health effects that might result from exposure to toxic substances. It also provides waste minimization and pollution prevention services.

Mining and Geotechnical Services: The company's mining and geotechnical staff provide environmental and construction services, including feasibility analyses, design, permitting, operations, and closure of mining facilities. Its geotechnical practice includes geotechnical engineers, soils technicians, and drillers who investigate, analyze, and develop geotechnical engineering recommendations and designs for problems relating to groundwater, soil, or rock.

Systems Support and Security: The company provides technology systems integration to improve national security, principally for the U.S. federal infrastructure. Its projects range from infrastructure vulnerability assessments to security engineering, design, and project management services. It provides systems analysis and information management for the U.S. commercial aviation system, and outsourced technical services for the national security.

Technical Support Services (TSS)

TSS advises clients through the study, design, and implementation of projects. TSS conducts research in the areas of remedial planning, disaster management, sustainable solutions, including climate change and carbon management, technical government staffing services, and program management for the U.S. federal government and international development projects.

Remedial and Environmental Planning: The company provides services for environmental planning, cleanup, and reuse of sites contaminated with hazardous materials, toxic chemicals, and oil and petroleum products. Sites range from small properties undergoing voluntary cleanup to brownfields redevelopment projects to Department of Defense (DoD) installations to superfund sites in the U.S. It also provides various environmental analysis and planning services. Its services include air quality management, regulatory compliance, information management and geographic information systems (GIS), radiation protection/health physics, risk management, pollution prevention/control, radia
