## Abstracts

Texas Industries Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Texas Industries Inc. and its competitors. This provides our Clients with a clear understanding of Texas Industries Inc. position in the [Building Products and Construction Materials](#) Industry.

The report contains detailed information about Texas Industries Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Texas Industries Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Texas Industries Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Texas Industries Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Texas Industries Inc. business.

## **About Texas Industries Inc.**

Texas Industries, Inc. engages in the production and sale of heavy construction materials in the United States.

### Segments

The company operates in three segments: Cement, Aggregates, and Consumer products.

#### Cement Segment

The Cement segment produces gray portland cement and specialty cements, such as masonry and oil well cements. Its cement production facilities are located at three sites in Texas and California: Midlothian, Texas, south of Dallas/ Fort Worth; Hunter, Texas, south of Austin; and Oro Grande, California, near Los Angeles. The company markets its cement products in the southwestern the United States. Its principal marketing area includes the states of Texas, Louisiana, Oklahoma, California, Nevada, and Arizona.

#### Aggregates Segment

The Aggregates segment produces natural aggregates and specialty lightweight aggregates.

**Natural Aggregates:** The company's natural aggregate operations produce sand, gravel, and crushed limestone. These operations are conducted from facilities primarily serving the Dallas/Fort Worth, Austin, and Houston areas in Texas; the southern Oklahoma area; and the Alexandria and Monroe areas in Louisiana.

**Lightweight Aggregates:** Expanded shale and clay, a specialty aggregate product, is manufactured from facilities serving the Dallas/Fort Worth, Austin and Houston areas in Texas; the Oakland/San Francisco and Los Angeles areas in California; and the Denver area in Colorado.

### Consumer Products Segment

The Consumer Products segment produces primarily ready-mix concrete and packaged products.

**Ready-mix Concrete:** The company's ready-mix concrete operations are situated in three areas in Texas (Dallas/Fort Worth/Denton, Houston, and east Texas), in north and central Louisiana, and at one location in southern Arkansas. It manufactures and supplies a substantial amount of the cement and aggregates used by the ready-mix plants. The remainder is purchased from outside suppliers. Ready-mix concrete is sold to various contractors in the construction industry.

**Other Products:** The company manufactures and markets packaged concrete mix, mortar, sand and related products from plant or distribution sites it owns in the Dallas/Fort Worth, Austin, and Houston areas in Texas. The company also markets its Maximizer packaged concrete mix in southern California. These products are sold by the retailers to contractors, distributors and property owners.

### Markets

The company serves multiple end-use markets, including the public works, residential, commercial, retail, industrial and institutional construction sectors, as well as the oil and gas industry.

### History

Texas Industries, Inc. was founded in 1946.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
