Thermo Tech Technologies Inc. Due Diligence Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Thermo Tech Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Thermo Tech Technologies Inc. position in the Commercial Services and Supplies Industry.

- The report contains detailed information about Thermo Tech Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.
- Another part of the report is a SWOT-analysis carried out for Thermo Tech Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.
- The Thermo Tech Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes Thermo Tech Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Thermo Tech Technologies Inc. business.

About Thermo Tech Technologies Inc.

Thermo Tech™ Technologies Inc (Thermo Tech™ or the Company) is registered in the Yukon, Canada, and has traded in the public market since 1987. The company holds the patents to a unique organic waste conversion technology and has developed turnkey commercial designs for its Thermo Master™ Plants, operating at capacities of up to 1200 tons per day receiving. One such facility is the Company's flagship Hamilton Bio Conversion Inc.

Thermo Tech™ licenses each plant for the use of its Thermo Master™ technology and also grants master licenses to capable firms, for exclusive territories. Through construction, ownership and operation of its own plants and the efforts of master license holders to construct and operate Thermo Master™ plants elsewhere, the Company has plans to roll out a large number of its unique facilities throughout the world.

The Thermo Master™ technology converts organic materials normally designated as wastes suitable only for disposal, into useful end products such as animal feed ingredients and fertilizers. The high temperatures eliminate pathogenic (disease causing) bacteria and other microbes as well as any other noxious inclusions such as insect eggs or larvae. The thermophilic (heat loving) organisms that carry out the process improve the overall nutrient profile of the end product, which is then dried to a stable pellet, easy to handle, transport and use. Thermo Tech™ has specific service agreements with Planet Earth Operating Services Inc. that support it in the normal conduct of business in North America and elsewhere.

Products

The Company owns and licenses the Thermo Master™ technology. Thermo Tech™ launched its business in North America, where its flagship, 1200 ton per day capacity Hamilton Bio Conversion plant is located. Most recently, with the acquisition of Firmaplus Sdn Bhd of Malaysia, the Company has targeted and is opening a market within one industrial sector that can reasonably be projected to require 100 plants or more.

Using the patented process, wet organic waste materials are transformed to pelleted dry products, well suited to commercial feeding of livestock. These pellets can be conveniently shipped, handled and blended by feed companies and end users to make final diet formulations. The end result is valuable feed products and water.

Firmaplus Market

Firmaplus holds the license for Malaysia, Indonesia, Thailand and the Philippines. Malaysia currently has about 380 palm oil mills, which operate year round, at an average of approximately 20 hours per day. Malaysia produces over 50% of the world's palm oil (some 11 million tonnes). Indonesia, located "right next door" is growing in capacity and importance and currently accounts for something in the range of 40% of the world production of palm oil. There are in excess of 200 plants in Indonesia with more in the planning.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
