Such information creates your awareness about principal trends of TheStreet.com, Inc. business.

About TheStreet.com, Inc.

TheStreet.com, Inc. operates as a digital financial media company. The company provides readers and advertisers with various subscription-based and advertising-supported content and tools through a range of online platforms, including Web sites, mobile devices, email services, widgets, blogs, podcasts, and online video channels.

TheStreet is the company's advertising-supported property. Its subscription products – which include a paid Web site, RealMoney, and various paid email products, including Actions Alerts PLUS, Breakout Stocks and ETF Action – are designed to address the needs of investors with various areas of interest.

The company's premium services business also includes information services from RateWatch business, which maintains a database of financial rate and fee data collected from approximately 70,000 financial institutions (at the branch level), including certificate of deposit, money market account, savings account, checking account, home mortgage, home equity loan, credit card, and auto loan rates. This information is sold to banks and financial institutions on an annual subscription basis, in the form of standard and custom reports that outline the landscape for clients, and also serves as the foundation for the data available on BankingMyWay, an advertising-supported web site that enables consumers to search for the most local and national rates from the

RateWatch data.

The company's premium services also includes syndication and licensing of certain of its content, including data from TheStreet.com Ratings (Ratings), which tracks the risk-adjusted performance of approximately 16,000 mutual funds and exchange-traded funds (ETFs) and approximately 5,000 stocks. The company's advertising-supported properties include TheStreet, Stockpickr, MainStreet and BankingMyWay.

Competition

The company's services face competition from other providers of business, personal finance, investing and ratings content, including online services or web sites focused on business, personal finance, or investing, such as The Wall Street Journal Online, CNN Money, MarketWatch.com, Bloomberg.com and CNBC.com, as well as financial portals such as Yahoo!

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
