Abstracts

ABB Installation Products Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ABB Installation Products and its competitors. This provides our Clients with a clear understanding of ABB Installation Products position in the [Electrical Equipment](#) Industry.

The report contains detailed information about ABB Installation Products that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ABB Installation Products. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ABB Installation Products financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ABB Installation Products competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ABB Installation Products business.

About ABB Installation Products

ABB Installation Products (ex Thomas & Betts Corp.) engages in the design and manufacture of electrical components used in industrial, construction, retail, utility, and communications markets. The company also produces commercial heating and ventilation units and engineered steel structures used for utility transmission. Its manufacturing, marketing, and sales activities are concentrated primarily in North America and Europe.

Segments

The company operates in three segments: Electrical; Steel Structures; and Heating, Ventilation and Air-Conditioning ('HVAC').

Electrical Segment

The Electrical segment designs, manufactures, and markets connectors, components, and other products for industrial, construction, utility, and communications applications. Products in this segment include fittings and accessories; fastening products, such as plastic and metallic ties for bundling wire, and flexible tubing; connectors, such as compression and mechanical connectors for high-current power and grounding

applications; indoor and outdoor switch and outlet boxes, covers and accessories; floor boxes; metal framing used as structural supports for conduits, cable tray, and electrical enclosures; emergency and hazardous lighting; utility distribution connectors and switchgear; power quality equipment and services; CATV drop hardware; radio frequency RF connectors; aerial, pole, pedestal, and buried splice enclosures; encapsulation and sheath repair systems; and other products, including insulation products, wire markers, and application tooling products. These products are sold under various brand names, such as Carlon, Color-Keyed, Cyberex, Diamond, Elastimold, Emergi-Lite, Furse, Homac, Iberville, Joslyn Hi-Voltage™, Kindorf, Kold-N-Klose, Ocal, LRC, Red Dot, Snap-N-Seal, Sta-Kon, Steel City, Superstrut, and Ty-Rap.

The Electrical segment's markets include industrial MRO (maintenance, repair, and operations) and OEM (original equipment manufacturers), construction, utility, and communications markets. The segment's product lines are primarily sold through major distributor chains, independent distributors and to retail home centers and hardware outlets. Its products are also sold directly to original equipment manufacturers, utilities, cable operators, and telecommunications and satellite TV companies.

Steel Structures Segment

The Steel Structures segment designs, manufactures, and markets engineered steel transmission structures. These products are primarily sold to the following types of end-users investor-owned utilities; cooperatives, which purchase power from utilities and manage its distribution to end-users; and municipal utilities. These products are marketed primarily under the Meyer and Thomas & Betts brand names.

HVAC Segment

The HVAC segment designs, manufactures, and markets heating, ventilation, and air conditioning products for commercial and industrial buildings. Products in this segment include gas, oil and electric unit heaters; gas-fired duct furnaces; indirect and direct gas-fired make-up air; infrared heaters; and evaporative cooling and heat recovery products. These products are sold primarily under the Reznor brand name through HVAC, mechanical, and refrigeration distributors throughout North America and Europe.

History

Thomas & Betts Corporation was founded in 1898.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
