The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Thomson Reuters Corporation business.

About Thomson Reuters Corporation

Thomson Reuters Corporation provides information for businesses and professionals in the financial, legal, tax and accounting, healthcare, science, and media markets worldwide. The company operates in approximately 100 countries.

Divisions

The company is organized in two divisions: Markets and Professional. Markets division consists of financial and media businesses; and Professional division consists of legal, tax and accounting, healthcare, and science businesses.

MARKETS DIVISION

The Markets division serves financial services and corporate professionals globally, with Reuters Media serving professional and consumer media market. The Markets division delivers critical information, supporting technology and infrastructure to a set of customers. The Markets division consists of Sales & Trading, Investment & Advisory, Enterprise, and Media businesses.

Sales & Trading

Sales & Trading provides a combination of information, community, trading, and post-trade connectivity requirements for the trading floor activities of buy-side and sell-side clients in foreign exchange (FX), fixed income and derivatives, equities and other exchange-traded instruments, as well as in the commodities and energy markets. As of December 31, 2009, Sales & Trading provided services to professionals in approximately 34,000 locations worldwide.

Sales & Trading's premium desktop information product is Reuters 3000 Xtra. Reuters 3000 Xtra users are financial markets professionals who require a combination of deep, global, cross-asset news and content combined with pre-trade decision-making, analytics and trade connectivity tools.

Sales & Trading's suite of products allows customers to trade with each other and connect their systems to electronic markets. Products include Dealing on Reuters, Matching on Reuters, Reuters Trading for Foreign Exchange, Reuters Trading for Fixed Income and Reuters Trading for Exchanges.

Reuters Trader is a financial desktop that provides analytics and trade connectivity for sales and trading professionals who need cross-asset data for global markets, but are primarily focused on a regional market.

Tradeweb operates a multi-dealer-to-customer trading platform which, as of December 31, 2009, connected approximately 35 major investment banks with 2,000 institutional clients.

Competition: Sales & Trading information products compete with Bloomberg, Sungard, Telekurs and IDC, as well as local, regional and niche competitors ranging from Markit and SuperDerivatives to Quick, Xinhua Finance and Yahoo! Finance. In the electronic trading business, Sales & Trading competes with Fidessa and the inter-dealer brokers, such as ICAP's EBS platform. In addition, Sales & Trading competes with single-bank and multi-bank portals such as FXall and MarketAxess.

Investment & Advisory

Investment & Advisory provides differentiated analytics, content and workflow tools that drive financial decision-making for customers in corporate services, investment management and research, investment banking and wealth management.

Investment & Advisory customers have direct, real-time access to the global, foundational content sets necessary for intelligent decision-making such as fundamentals, estimates, economics, ownership, broker research, deals data, fixed income, fund data, filings, real-time exchange data, tick history and time series data.

Corporate Services business provides companies worldwide with the solutions they need to develop a framework for decision-making across the enterprise. Solution sets include an integrated platform for Investor Relations (IR) professionals who need to understand key factors impacting their company's share price, anticipate investor behavior, communicate with key stakeholders and measure the impact of investor management efforts. Business Intelligence solutions are used by corporate development, strategy, corporate finance, treasury and information professionals to define a company's growth strategy and help assess the company's counterparty risk, while corporate communications professionals rely on the company's measurable webcasting solutions and distribution networks

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
