Such information creates your awareness about principal trends of Tianjin Port Development Holdings Ltd. business.

### **About Tianjin Port Development Holdings Ltd.**

Tianjin Port Development Holdings Limited, an investment holding company, operates terminals in Tianjin, China.

The company principally focuses on container handling operation at the port of Tianjin, providing its customers with port services. It has equity interests at three chief container terminals: the wholly-owned Tianjin Port Container Terminal Co., Ltd., the 40% owned Tianjin Port Alliance International Container Terminal Co., Ltd. (Alliance), and the 40% owned Tianjin Port Euroasia International Container Terminal Co., Ltd. At full capacity, these operations can reach a total container handling capacity of approximately 6 million TEUs.

The company also involves in the bulk cargo handling business through its wholly owned subsidiary – Tianjin Harbour Second Stevedoring Co., Ltd. It also has investments in a logistics park, through Tianjin Port Haifeng Bonded Logistics Co., Ltd. (HaiFeng), in the Dongjiang Bonded Free Port of the port of Tianjin.

### **Significant Events**

The company, in the year 2008, made a strategic investment in 5% in the equity of Tianjin Binhai Teda Logistics (Group) Corporation Limited (Teda Logistics). Teda Logistics is a logistics services provider in Tianjin.

**Acquisition of Tianjin Port Co:** In March 2009, the company entered into a sale and purchase agreement with Tianjin Port Group, pursuant to which the company conditionally agreed to acquire a 56.81% stake in Tianjin Port Co, from Tianjin Port Group (Group). Tianjin Port Co and the Group are the two main port terminal operators at the port of Tianjin with different business focuses. The Group focuses on container business whereas Tianjin Port Co focuses on bulk cargo business.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
