Abstracts

Tii Network Technologies, Inc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Tii Network Technologies, Inc and its competitors. This provides our Clients with a clear understanding of Tii Network Technologies, Inc position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Tii Network Technologies, Inc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Tii Network Technologies, Inc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Tii Network Technologies, Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tii Network Technologies, Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tii Network Technologies, Inc business.

About Tii Network Technologies, Inc

Tii Network Technologies, Inc. engages in the design, manufacture, and sale of products to service providers in the communications industry for use in their networks.

The company's products are found in the telephone operating companies (Telcos) central office, outdoors in the service providers' distribution network, at the interface where the service providers' network connects to the users' network, and inside the users' home or apartment. These products are used in the delivery of voice and broadband communication services.

Products

Network Interface Devices (NID) and Accessories

Network Interface Devices is a thermoplastic box located on the outside of a customer's premise, housing primary surge protectors, customer demarcation, customer termination ports, and various electronic circuits.

Network Interface Devices: The company's family of 1, 2, 3, 6, and 12 line NIDs is

designed to comply with industry environmental and electrical performance standards. Its NIDs incorporate various components, including its overvoltage surge protectors, Digital Subscriber Line (DSL) service splitters for broadband delivery and customer bridge modules, which facilitate customer access to the network. The company's NIDs are used in single family and multi-dwelling unit (MDU) applications.

Accessories: The company designs and manufactures a range of products designed to operate in its NIDs, as well as its competitor's NIDs. These products include station protectors, customer wiring modules to interconnect service to the home, DSL service splitters, electro-magnetic interference (EMI) filters, and line test modules, which enable remote testing of the integrity of the service providers' lines.

Broadband Products

The company's broadband products facilitate the deployment of triple play services (voice, video, and data) and comprise both active electronics and passive components.

Digital Subscriber Line Technology: The company has developed a line of DSL electronic products, including a line of xDSL POTS (plain old telephone service) splitters. These splitters isolate the voice and data signals on a Telco line to provide separate outputs for phone and data services which enable DSL services. The company's products also allow DSL signals to coexist with door entry/intercom systems and monitored alarm systems.

Intelligent NID: The company's outdoor intelligent residential gateway Outrigger, also referred to as an iNID, facilitates the delivery of triple-play bundled services – digital telephone, television, and Internet data by telephone or cable service providers. The company's configuration accomplishes this by embedding the Home Phone Network Alliance (HPNA) technology for delivering Internet Protocol (IP) technologies to customers over a home's existing cable TV (COAX) or telephone wiring.

HomePlug: HomePlug technology enables networking of voice, data and audio devices through the consumers' AC power lines. The company's HomePlug-compatible and HomePlug-embedded surge protectors incorporate its patented and proprietary AC protection, filtering, and HomePlug Powerline integrated circuits.

Connectivity Products

The company's connectivity products include both active and passive solutions that

incorporate wire management, tool-less design, insulation displacement contact (IDC), and gel-sealed options. These products are designed to support broadband-enabled services and network management.

Voice over Internet Protocol (VoIP) Products: These solutions provide Telco 'NID – like' enclosures and advanced gel sealed wire termination products for connection of broadband delivered VoIP telephony service. A range of connectivity solutions is offered for single family, MDU, and commercial applications.

Switchable Voice NID (SVN) Products: These solutions enable the installation and connection of VoIP telephony to cable subscribers and include SVNs which remotely activate VoIP telephony. Units are available for single family, multiple dwelling unit, and commercial applications.

Voice Intercom Systems (VIS) Products: These products are used in MDUs for telephony delivered via cable, fiber or DSL VoIP to e

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
