Abstracts

Tilting Capital Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Tilting Capital Corp. and its competitors. This provides our Clients with a clear understanding of Tilting Capital Corp. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Tilting Capital Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Tilting Capital Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Tilting Capital Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tilting Capital Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tilting Capital Corp. business.

About Tilting Capital Corp.

Tilting Capital Corp., a broadband communications company, provides access and application solutions to wired and wireless network service providers in Canada.

Segments

The company operates in two segments, TeraSpan and FatPort.

TeraSpan Networks, Inc.

The TeraSpan segment comprises the company's share of the operations of TeraSpan Networks Inc., which designs and constructs fibre optic networks.

TeraSpan designs and constructs fibre optic networks with its proprietary products, and provides product sales and licensing to qualified resellers that wish to offer TeraSpan inlaid fibre systems to their customers. TeraSpan provides its products and services primarily to private network operators, cable operators and telecommunications providers.

TeraSpan has developed and commercialized a patentpending Vertical Inlaid Fiber

(VIF) system as an alternative to the traditional methods of deploying fiber-optic networks. Its fiber optic technology enables broadband network deployments or upgrades, and delivers the infrastructure necessary to support the delivery of high-speed broadband services, such as digital television, gigabit Ethernet, and other IP-based services.

TeraSpan also provides training services to these customers in engineering, deploying and maintaining VIF networks. It also provides repair and maintenance services. On certain network construction projects, TeraSpan Networks includes additional fiber optic cable.

FatPort Corporation

The FatPort segment comprises the operations of the company's wholly owned subsidiary FatPort Corporation, which provides public high-speed wireless Internet access to individual and corporate subscribers. FatPort's open source solutions are also licensed worldwide to wireless Internet service providers who use its software and hardware solutions to operate networks on a turnkey basis.

FatPort provides public high-speed wireless Internet access to individual and corporate subscribers who use wireless-enabled laptops, pocket PC's or handheld devices through FatPort enabled locations called hotspots. FatPort provides various products to retail customers as well as flexible wholesale options to strategic partners.

FatPort has developed a network serving the emerging public Wi-Fi marketplace. FatPort also offers a range of other services related to its industry:

FatPort distributes equipment and backend systems which allow providers in other geographic areas or industry verticals to deploy a similar wireless service by being a FatPort Powered Provider (FPP) under the provider's own brand.

FatPort, through its Professional Services division, provides in location access, installation services and hardware to enable Wi-Fi hotspots that are located in public areas within retail, transportation or hotel properties.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
