Such information creates your awareness about principal trends of TMX Group Inc. business.

About TMX Group Inc.

TMX Group Inc. owns and operates cash, derivatives, energy, fixed income markets and clearing houses in Canada and the United States.

Products and Services

The company's listings operations take place through Toronto Stock Exchange, its senior market, and TSX Venture Exchange, its junior market. TSX Venture Exchange also offers a board called NEX6 for issuers that have fallen below TSX Venture Exchange's ongoing listing standards.

Issuers list various types of securities, including conventional securities, such as common shares, preferred shares, rights and warrants, and various alternative types of securities such as exchangeable shares, convertible debt instruments, limited partnership units, exchange traded fund units, income trust units and structured products.

Competition: The company competes for junior listings with Canadian National Stock Exchange (CNSX).

TSX Markets – Cash Equities Trading

The company's cash equities trading operations for both Toronto Stock Exchange and TSX Venture Exchange are conducted by TSX Markets. Participating Organizations and Member Firms (collectively, POs), acting as principals or agents for retail and institutional investors, place orders to buy or sell listed securities using its fully electronic trading systems.

MX and BOX – Derivatives Trading and Clearing

The company's derivatives exchange, MX, is standardized financial derivatives exchange in Canada. MX offers interest rate, index and equity derivatives. Through the Canadian Derivatives Clearing Corporation (CDCC), MX's wholly-owned subsidiary, the company provides clearing, settlement and risk management services, as well as being the issuer of every option traded on MX's markets. CDCC is the central counterparty and guarantor of all transactions carried out on MX's markets and of some over-the-counter, or OTC products.

MX has a 53.8% ownership interest in BOX, a U.S. automated equity options market for which MX is the technical operator and technology developer. MX has a 51% ownership in the Montréal Climate Exchange Inc., or MCEX, a market for environmental products in Canada, jointly created with the Chicago Climate Exchange Inc. In 2008, MCEX launched trading of futures contracts on Canadian carbon dioxide equivalent units. The company's derivatives markets engages in MX's trading, clearing, market data and business services activities as well as from trading on BOX.

Derivatives-Trading

MX offers interest rate, index and equity derivatives. Primary products are the Three-Month Canadian Bankers' Acceptance Futures contract (BAX), the Ten-Year Government of Canada Bond Futures contract (CGB) and the S&P Canada 60 Index Futures contract (SXF). MX connects participants to its derivatives markets, builds business relationships with them and works with them to ensure that the derivatives offerings meet investor needs. BOX is an options exchange in the U.S., offering an electronic equity derivatives market on approximately 1,500 options classes.

Derivatives-Clearing

Through CDCC, MX's wholly-owned subsidiary, the company generates revenue from

clearing and settlement, as well as from options and futures exercise activities. CDCC offers central counterparty and clearing and settlement services for all transactions carried out on MX's markets and on some OTC products. In addition, CDCC is the issuer of options traded on MX markets and the clearing house and guarantor for options and futures contracts traded on MX markets and for some products on the OTC market.

Derivatives-Regulatory Division

MX is a self-regulatory organization (SRO) that has a major responsibility for maintaining the transparency, credibility and integrity of the exchange-traded derivatives market in Canada. MX's Regulatory Division, which is operated independently of its other operations, is responsible for the regulation of its markets and its trading participants.

Competition: The company competes with Chicago Board Options Exchange (CBOE), ISE, NASDAQ OMX PHLX (PHLX), NASDAQ Options Market (NOM), NYSE Amex Options (AMEX) and NYSE Arca Options (ARCA)

NGX

The company's energy market, NGX, is a Canadian-based e

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
