Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TomTom NV business.

About TomTom NV

TomTom NV engages in the development and sale of personal navigation solutions and digital maps. The company provides mobile navigation solutions, map content and services to handset manufacturers and network operators. It has operations in Europe, North America, the Middle East, Africa, and the Asia Pacific.

Business Units

The company had four customer facing business units: TomTom, Tele Atlas, WORK, and Automotive.

TomTom

The TomTom business unit sells portable navigation solutions (PNDs) to consumers via retailers and distributors. It makes all-in-one portable navigation devices that enable customers to navigate straight out of the box. These include the TomTom GO range, the mid-range product family, the TomTom XL, the TomTom ONE family and the TomTom RIDER for two-wheel navigation.

Tele Atlas

The Tele Atlas business unit sells digital maps and related content and services to various industries. It offers digital maps of approximately 80 countries in Europe, North and South America, the Middle East and Asia, and through partnerships it offers global customers supplemental coverage of an additional 120 countries and territories worldwide.

The company's customers include the PND manufacturers, global Internet mapping and routing Web sites, wireless handset manufacturers and carriers, LBS application developers, car manufacturers and their suppliers, and enterprise and government entities.

WORK

The WORK business unit offers professional solutions for commercial fleets. Its connected navigation products and services allow enterprises to monitor, manage and communicate with their drivers and fleets of vehicles, thereby increasing the safety and professionalism of their whole mobile operation.

WORK sells its solutions in Germany, Austria, Switzerland, the United Kingdom, Ireland, Belgium, the Netherlands, Italy, France, Spain, Portugal, Poland and Denmark and also started to develop its business in the U.S.

Automotive

The Automotive business unit develops and sells navigation systems and services to car manufacturers and OEMs worldwide.

History

TomTom NV was founded in 1991.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
