The Torch Energy Royalty Trust financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Torch Energy Royalty Trust competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Torch Energy Royalty Trust business.

About Torch Energy Royalty Trust

Torch Energy Royalty Trust, a grantor trust, holds net profits interests to receive payments from Torch Royalty Company and Velasco Gas Company, Ltd.

The company is entitled to receive 95% of the net proceeds attributable to oil and gas produced and sold from wells on the underlying properties. The underlying properties constitute working interests in the Chalkley Field in Louisiana (Chalkley Field), the Robinson's Bend Field in the Black Warrior Basin in Alabama (Robinson's Bend Field), fields that produce from the Cotton Valley formations in Texas (Cotton Valley Fields), and fields that produce from the Austin Chalk formation in Texas (Austin Chalk Fields).

Properties

Chalkley Field: The underlying properties in the Chalkley Field, located in Cameron Parish, Louisiana, include an average 16.2% working interest (12.1% net revenue interest) in 5 unitized wells (excluding Infill Wells) producing from the Miogyp B reservoir. As of December 31, 2009, one Infill Well had been drilled on the underlying properties in the Chalkley Field. A subsidiary of ExxonMobil Corporation operates the wells.

Robinson's Bend Field: The underlying properties include an average 40.0% working interest (30.4% net revenue interest) in 392 wells (excluding Infill Wells) in the Robinson's Bend Field in the Black Warrior Basin of Alabama. As of December 31, 2009, 34 Infill Wells had been drilled on the underlying properties in the Robinson's Bend Field. The wells in the Robinson's Bend Field are operated by a third party, Robinson's Bend Operating II, LLC.

Cotton Valley Fields: The underlying properties include an average 52.9% working interest (39.2% net revenue interest) in 41 wells (excluding Infill Wells) in 4 fields that produce from the Upper and Lower Cotton Valley formations in Texas. As of December 31, 2009, 32 Infill Wells had been drilled on the underlying properties in the Cotton Valley Fields. A subsidiary of Torch Energy Advisors Incorporated (Torch) operates 40 of these wells. The remaining wells are operated by Samson Lone Star Limited Partnership (Samson).

Austin Chalk Fields: The underlying properties include an average of 18.4% working interest (14.1% net revenue interest) in 63 wells in the Austin Chalk Fields of Central Texas. Production from these fields is derived primarily from the fractured Austin Chalk formation using horizontal drilling techniques. A subsidiary of Torch operates two wells in the Austin Chalk Fields. The remaining wells in the Austin Chalk Fields are operated by third parties.

History

Torch Energy Royalty Trust was founded in 1993.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
