The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tornado Gold International Corp. business.

About Tornado Gold International Corp.

Tornado Gold International Corporation, an exploration stage company, engages in the exploration of mining properties for commercial development and production. The company primarily explores for gold in Nevada.

The company has interests in 16 properties, which comprise approximately 44,840 acres located in the North Central Nevada area. Its properties include Jack Creek, Brock, Dry Hills, Golconda, Goodwin Hill, HMD, Horseshoe Basin, Illipah, Marr, North Battle Mountain, NT Green, South Lone Mountain, Stargo, Walti, West Whistler, and Wilson Peak.

Properties

As a result of the 2008 Exploration and Option to Enter Operating Agreement, the company has mining claims in three properties that include the Jack Creek property, the Illipah property, and the NT Green property.

The Jack Creek Property: The Jack Creek property comprises approximately 6,000 acres in Elko County, Nevada, and is located in the northern Independence Mountains. The company has an option to earn 50% interest in 53 claims at the Jack Creek

Property, Elko County, Nevada.

NTGreen Property: The NTGreen property is located in central Lander County, Nevada, approximately 30 miles southwest of the town of Battle Mountain. The company holds 12 unpatented lode mining claims in the form of an option agreement with the claimant.

Illipah Prospect: The company entered into an agreement to acquire the Illipah prospect consisting of 191 unpatented mining claims located in White Pine County, Nevada. The Illipah prospect is situated in eastern Nevada at the southern extension of the Carlin Trend. The property consists of approximately 3,820 acres.

Joint venture

In September, 2007, the company entered into a joint venture agreement with Allied Nevada Gold Corp.

History

The company was incorporated in 2001. It was formerly known as Nucotec, Inc. and changed its name to Tornado Gold International Corporation in 2004.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
