The Total Containment, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Total Containment, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Total Containment, Inc. business.

About Total Containment, Inc.

Total Containment, Inc (the Company) was incorporated in Pennsylvania. The Company is a manufacturer and distributor of underground systems, products and services for the conveyance and containment of petroleum and alcohol based motor vehicle fuels from underground storage tanks to aboveground fuel dispensers. The Company's systems and products are used in connection with the installation of new and the retrofitting of existing underground fuel containment and distribution systems (Fuel Containment Systems).

Rene Morin, Inc., a wholly owned subsidiary, fabricates rubber components mainly for the Company. TCI-Environment NV provides sales support for the Company's products in Europe.

Principal Products

The principal products of the Company: Enviroflex®, Sump/risers, Dispenser Liquid, Bulkhead fittings and reducers, Tank Jacket®.

Geographic Markets

In addition to the United States, the Company's geographic market for its products includes Canada, Mexico, Central and South America, Europe (including the EEC, Hungary and Poland), Australia, New Zealand, Southeast Asia (including Singapore, Thailand, Taiwan and Hong Kong), and the Middle East (including Turkey and Israel).

End Users

The principal domestic end users of the Company's products are major oil companies, retail business operators and convenience store chains which purchase the Company's products in connection with the installation of new and the retrofitting of existing Fuel Containment Systems. The Company's other domestic customers are primarily state and local government bodies, utilities and other fleet vehicle operators.

Competition

The Company's principal competitors in the market for underground piping systems (including sump risers and dispenser sumps) are divisions or subsidiaries of A. O. Smith Corporation and Ameron, Inc., both of which are fiberglass manufacturers, as well as Environ Products, Inc., a manufacturer of flexible piping systems, and a new competitor of the Company, OPW Fueling Components (OPW), a division of Dover Resources, Inc.

The Company's primary competition for Tank Jackets includes manufacturers of fiberglass, fiberglass clad and steel tanks. Of these competing manufacturers, Fluid Containment, Inc. and Xerxes Corporation are both fiberglass tank manufacturers.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
