company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Transatlantic Holdings Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Transatlantic Holdings Inc. business.

About Transatlantic Holdings Inc.

Transatlantic Holdings, Inc., through its subsidiaries, offers reinsurance capacity for a range of property and casualty products, directly and through brokers, to insurance and reinsurance companies, in both the domestic and international markets on both a treaty and facultative basis.

The company's subsidiaries include Transatlantic Reinsurance Company (TRC); Trans Re Zurich (TRZ); and Putnam Reinsurance Company (Putnam). TRC and Putnam are licensed, accredited, authorized or can serve as a reinsurer in 50 states and the District of Columbia in the United States and in Puerto Rico and Guam. Through its international locations, the company has operations worldwide, including Canada, six countries in Europe, three countries in Central and South America, one country in Africa, one country in Asia (excluding Japan), Japan, and Australia.

TRC is licensed in Canada, Japan, the United Kingdom, the Dominican Republic, the Hong Kong Special Administrative Region, the People's Republic of China and Australia. TRC is an Admitted Reinsurer in Brazil, where it maintains an office in Rio de Janeiro. In addition, TRC is registered and authorized as a foreign reinsurer in Argentina (where it maintains a representative office in Buenos Aires, Transatlantic Re (Argentina) S.A.), the Republic of Panama (where it maintains a representative office,

TRC (PANAMÁ) S.A.), Bolivia, Chile, Colombia, Ecuador, El Salvador, France, Germany, Guatemala, Honduras, Mexico, Nicaragua, Paraguay, Peru, Uruguay and Venezuela, and is authorized to maintain a representative office in Shanghai, the People's Republic of China.

TRZ is licensed as a reinsurer in Switzerland and registered in Paraguay, Ecuador, Argentina, Honduras, El Salvador, the Dominican Republic and Colombia. Transatlantic Polska Sp. z o.o., a subsidiary of TRC, maintains a registered representative office in Warsaw, Poland. The company also operates Professional Risk Management Services, Inc. (PRMS), a wholly-owned subsidiary of the company. Based in Arlington, VA, PRMS is an insurance program manager specializing in professional liability insurance services, including underwriting, claims and risk management, for individual healthcare providers, group practices, facilities, and organizations.

The Reinsurance Business

The company offers two types of reinsurance based on the underlying insurance coverage, Casualty and Property.

Casualty: Casualty insurance protects the insured against financial loss arising out of its obligation to others for loss or damage to their person or property. Casualty reinsurance protects the ceding company against loss to the extent of the reinsurance coverage provided. The company's principal lines of casualty reinsurance include other liability (including directors' and officers' liability (D&O), errors and omissions liability (E&O) and general casualty), medical malpractice, ocean marine and aviation, auto liability (including non-standard risks), accident and health (A&H), and surety and credit.

Property: Property insurance protects the insured against financial loss arising out of the loss of property or its use caused by an insured peril. Property reinsurance protects the ceding company against loss to the extent of the reinsurance coverage provided. The company's principal lines of property reinsurance include fire, allied lines, auto physical damage and homeowners multiple peril.

The company writes reinsurance either through treaty or facultative reinsurance arrangements:

Treaty: Treaty reinsurance is a contractual arrangement that provides for the automatic reinsuring of a type or category of risk underwritten by the ceding company. The company's treaty business consists primarily of business within the other liability

(including D&O and E&O), A&H, medical malpractice, ocean marine and aviation, auto liability (including non-standard risks), surety and credit, fire, allied lines, auto physical damage, and homeowners multiple peril lines.

Facultative: Facultative reinsurance is the reinsurance of individual risks. Rather than agreeing to reinsure all or a portion of a class of risk, the reinsurer separately rates and underwrites each risk. Facultative reinsurance is normally purchased for risks not covered by treaty reinsurance or for individual risks covered by reinsurance treaties that are in need of capacity beyond that provided by such treaties.

The company provides reinsurance for major lines of insurance on both pro rata and excess-of-loss bases. A ceding company's reinsurance program may involve pro rata and excess-of-loss reinsurance on both a treaty and facultative basis:

Pro rata: Under pro rata reinsurance (also referred to as proportional), the ceding company and the reinsurer share the premiums, as well as the losses and expenses in an agreed proportion.

Excess-of-Loss: Under excess-of-loss reinsurance, the reinsurer agrees to reimburse the ceding company for losses in excess of a predetermined amount up to a predetermined limit. Premiums paid by the ceding company to the reinsurer for excess-of-loss coverage are generally not proportional to the premiums that the ceding company receives because the reinsurer does not assume a proportionate risk.

Marketing

The company provides property and casualty reinsurance capacity through brokers, as well as directly to insurance and reinsurance companies in both the domestic and international markets. Its major customers include Aon Corporation and Marsh & McLennan Companies, Inc.

History

The company was founded in 1986. It was formerly known as PREINCO Holdings, Inc. and changed its name to Transatlantic Holdings, Inc. in 1990.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need

2-3 days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
