The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Transcat Inc. business.

About Transcat Inc.

Transcat, Inc. engages in the distribution of professional grade test and measurement instruments. The company provides calibration, repair, and weighing system services.

The company is primarily focused on providing its products and services to the following markets: the pharmaceutical industry and FDA-regulated (such as food and beverage) businesses; industrial manufacturing companies; the energy industry and power, natural gas and water utility companies; the chemical process industry; and other industries which require accuracy in their processes and confirmation of the capabilities of their equipment.

Segments

The company conducts its business through two segments, Distribution Products and Calibration Services.

Distribution Products Segment

Through its Distribution Products segment, the company markets and distributes national and proprietary brand instruments to approximately 14,000 global customers. The company's product catalog (Master Catalog) offers access to approximately 25,000

test and measurement instruments, including calibrators, insulation testers, multimeters, pressure and temperature devices, oscilloscopes, recorders, and related accessories. These products are available from approximately 300 manufacturers, including Fluke, GE, Emerson, and Hart Scientific. In addition, the company is the worldwide distributor for Transmation and Altek products.

Accredited Calibration Services segment

Through its Accredited Calibration Services segment, the company offers calibration, repair and weighting system services. As of March 27, 2010, the company operated 12 calibration laboratories located across the United States, Puerto Rico, and Canada servicing approximately 9,200 customers. In addition, its acquisition of United Scale & Engineering Corporation has also provided entry into both the distribution and service segments of the industrial scales and weighing systems marketplace in the Wisconsin, Northern Illinois, and Upper Michigan areas.

CalTrak is its proprietary documentation and asset management system which is used to manage both the workflow at its Calibration Centers of Excellence and its clients' assets. With CalTrak, the company provides its customers with calibration service while optimizing its own efficiencies. Additionally, CalTrak-Online provides its customers direct access to calibration certificates, calibration data, and access to other key documents required in the calibration process.

Customers

The company's major customers include Wyeth, Johnson & Johnson, DuPont, Exxon Mobil, Dow Chemical, Nestle, and Duke Energy.

Suppliers

The company's major supplier is Fluke Electronics Corporation.

Markets

The company's domestic and international inbound sales organization covers territories in North America, Latin America, Europe, Africa, Asia, and the Middle East. Its calibration and repair services are offered in North America and Puerto Rico.

History

Transcat, Inc. was founded in 1964.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
