The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TRC Companies Inc. business.

About TRC Companies Inc.

TRC Companies, Inc. operates as a national consulting, engineering, and construction management company that provides integrated services to the environmental, energy, and infrastructure markets primarily in the United States.

Services

The company's services are focused on three segments: Energy, Environmental, and Infrastructure.

Energy

The company provides various services, including support in the licensing and engineering design of new sources of power generation, electric transmission system upgrades, and natural gas and liquid products pipelines and terminals. Key markets for its energy operating segment are:

Energy Efficiency: The company develops and manages statewide energy efficiency programs in New York and New Jersey that reduce energy use. It provides services,

such as program design, program management, quality control, engineering, financial tracking, and reporting. In addition to its statewide programs, the company also designs and manages portfolio energy efficiency programs, including a range of services from program management to engineering, quality control, and construction inspection for a spectrum of end users, including commercial office buildings, hospitality chains, educational facilities, residential complexes, and military installations. The company is also actively focused on the relationship of energy conservation measures to the reduction in carbon footprints.

Electric Transmission: The company provides full scope engineering design, material procurement, and construction management services. It also provides essential operations and management support to utilities as the trend towards outsourcing engineering functions continues.

Environmental

The company provides support to buyers and sellers in the pre-disposition due diligence and asset valuation process. Its exit strategy program grew to prominence in response to the need for responsible parties, as well as buyers and sellers, to resolve environmental remediation uncertainties. The company also operates in the area range of services from program management to engineering, quality control and construction inspection for a spectrum of end users, including commercial office buildings, hospitality chains, educational facilities, residential complexes, and military installations. Special services it offers are:

Exit Strategy Services: The company's exit strategy offering has been especially attractive to clients in the following situations:

Discontinued Operations: The company assumes responsibility for the cleanup of contamination at closed or redundant facilities, allowing its clients to focus attention on their core business operations.

Bankruptcy: Debtors and the creditors are seeking the highest possible value for saleable assets and relief from lingering environmental liabilities. By assuming those liabilities, the company can help achieve a responsible financial solution.

Acquisitions and Divestitures: The company assumes responsibility for existing environmental liabilities which neither the buyer wants to assume nor the seller wants to retain.

Multi-Party Superfund Sites: By transferring sole responsibility for the cleanup of Superfund sites from groups of potentially responsible parties to the company, the cleanup schedule can be accelerated.

Brownfield Real Estate Development: By assuming full responsibility for site cleanup and defining the related cost with certainty, its exit strategy program aids in the settlement of the commercial issues among interested parties, such as property owners, developers, and municipalities, that often stall the redevelopment process.

RE Power: RE Power is a program where the company, in conjunction with a decommissioning and demolition company, provides dismantling, cleanup, liability transfer, and asset optimization solutions to power companies that elect to decommission and reposition their aging power plant assets.

Infrastructure

The company offers various services to its infrastructure clients primarily related to rehabilitation of overburdened and deteriorating infrastructure systems; design and construction management associated with new infr

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
