Abstracts

Trend Mining Co. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Trend Mining Co. and its competitors. This provides our Clients with a clear understanding of Trend Mining Co. position in the Industry.

The report contains detailed information about Trend Mining Co. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Trend Mining Co.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Trend Mining Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Trend Mining Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Trend Mining Co. business.

About Trend Mining Co.

Trend Mining Company engages in the acquisition and exploration of diverse metal properties in the United States and Canada. The company controls exploration properties which are prospects for copper-nickel, platinum-palladium, and uranium mineralization in Saskatchewan, Montana and Wyoming.

Properties

Stillwater Project, Montana

The company, in February 2005, and Aurora Metals (BVI) Limited entered into a joint venture agreement to explore for platinum group metals (PGM mineralization) as well as copper and nickel on certain claims covering portions of the Stillwater layered intrusive complex in Montana. The Stillwater property leased by the company consists of portions of 60 unpatented and 17 patented mining claims covering approximately 1,400 acres. The Stillwater Complex is a layered intrusive rock body which hosts a number of deposits and occurrences of platinum, palladium, copper, nickel, chrome, and minor gold mineralization.

Lake Owen, Wyoming

The company, as of June 2006, leased the Lake Owen project to RMP Resources, a private company. The Lake Owen platinum group metals and magnetite property is located in Albany County, Wyoming, in the Medicine Bow-Routt National Forest. The Lake Owen property is approximately 40 miles southwest of Laramie, Wyoming. The Company holds the Lake Owen and adjoining Albany properties by 601 unpatented mining claims. The Lake Owen property is a platinum-palladium-magnetite occurrence hosted in an extensive layered igneous intrusive complex with a lateral dimension of approximately four by six miles.

Diabase Peninsula, Cree Lake Area, Saskatchewan, Canada

The Diabase Peninsula uranium property is located along the western shore of Cree Lake, approximately 570 kilometers (350 miles) due north of Saskatoon. The Diabase Peninsula property consists of eight mining claims covering 18,646 hectares (72 square miles).

Peter Lake, Saskatchewan, Canada

The Peter Lake Domain hosts known occurrences of copper-nickel and platinum-palladium mineralization. The property is located immediately west of Reindeer Lake in northern Saskatchewan, Canada, approximately 190 miles north/northeast from La Ronge. The Peter Lake property consists of seven mining claims covering 14,781 hectares (36,500 acres or 57 square miles).

Andacollo, Chile

The company has 30% interest in Compania Minera Dayton (CMD), a Chilean corporation that owns and operates the Andacollo Mine in Chile.

History

Trend Mining Company was incorporated in 1968. The company was formerly known as Silver Trend Mining Company and changed its name to Trend Mining Company in 1999.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
