Abstracts

Tri-Tech Holding, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Tri-Tech Holding, Inc. and its competitors. This provides our Clients with a clear understanding of Tri-Tech Holding, Inc. position in the [Utilities](#) Industry.

The report contains detailed information about Tri-Tech Holding, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Tri-Tech Holding, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Tri-Tech Holding, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tri-Tech Holding, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tri-Tech Holding, Inc. business.

About Tri-Tech Holding, Inc.

Tri-Tech Holding Inc. provides integrated solutions for water environmental protection industry in China, including the water pollution remediation, software, and engineering industries. The company combines software and hardware to monitor and manage China's natural and municipal water resources.

Segments

The company provides services in two segments, Water and Wastewater Treatment Process Control Systems, and Process Tail Gas Purification (Wastewater and Tail Gas Treatment); and Water Resources Protection and Allocation, Flood Control and Forecasting, Irrigation Systems, and Municipal Water Supply and Distribution Systems (Water Resource Management).

Wastewater and Tail Gas Treatment

Through its Wastewater and Tail Gas Treatment segment, the company designs sewage treatment and odor control systems for municipal supplies. These systems, which coordinate technological solutions (software, management information systems, enterprise resource planning and local and wide area networking) with hardware

(sensors, distributed control systems, programmable logic controllers, supervisory control and data acquisition systems and mechatronics), allow its clients to monitor and control numerous variables in the sewage treatment and odor control processes.

Sewage Treatment and Water Recycling/Sewage Water Pipeline Network

Electric Automation and Dispatching Management System for Cities: These systems are able to track various variables in a sewage treatment facility and allow the city to control the system electronically to react to chemical and other changes and to ensure safe treatment of sewage. The company engineers, procures, and install these systems, including high- and low-voltage electrical equipment, controls, instruments, and management information systems required by the projects.

Sewage Water Plant/Recycling

Electric Instruments Automation Water Management System: The company provides systems to allow municipalities to reuse and recycle both grey water (the non-industrial waste water generated from domestic processes, such as dish washing, laundry and bathing) and industrial waste water. It also provides pump station electrical and mechanical equipment and municipal water supply plant and distribution pipelines for its clients. The company engineers, procures, and installs these systems, including high- and low-voltage electrical equipment, controls, instruments, and management information systems required by the projects.

Recycling

Tranhold Series Biofiltration Odor Control Systems (Patented): The company provides its patented biofiltration odor control systems to municipal wastewater treatment plants and pump stations to eliminate offensive odors emitted at the sources. It engineers, manufactures, procures, installs, integrates, and commissions the entire system for its clients.

Tranhold Chemical Scrubbing Odor Control Systems: The company provides chemical scrubbing odor control systems to eliminate offensive odors with higher concentrations, usually emitted from industrial wastewater treatment plants and processes. Its customers commission the company to combine its chemical scrubbing units and biofiltration odor control systems to further improve odor elimination.

Process Control and Monitoring System Software (Certified): The company provides

process control and monitoring system software to integrate entire water/wastewater treatment plants, and to combine individual unit operations into complete systems. It programs and customizes the software to match its clients' specific needs.

Sewage Treatment Operation Management System: The company provides sewage treatment plant operation and maintenance management services for its clients after it builds the treatment plants for them.

Water Resource Management

Through its Water Resource Management segment, the company assists the government in monitoring natural waterways. The company provides systems that combine technological solutions (software, geological information systems, management information systems, enterprise resource planning and local, wireless and wide area networking) with hardware (sensors, supervisory control

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
