## Abstracts

Trican Well Service Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Trican Well Service Ltd. and its competitors. This provides our Clients with a clear understanding of Trican Well Service Ltd. position in the [Energy](#) Industry.

The report contains detailed information about Trican Well Service Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Trican Well Service Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Trican Well Service Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Trican Well Service Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Trican Well Service Ltd. business.

### **About Trican Well Service Ltd.**

Trican Well Service Ltd. provides an array of specialized products, equipment and services used during the exploration and development of oil and natural gas reserves.

The company has operations in Canada, Russia, Kazakhstan, the United States and Algeria. The Canadian operations provide services to customers across the entire Western Canadian Sedimentary Basin (WCSB). The company conducts its Russian operations through bases situated in western and eastern Siberia and Kyzylorda, Kazakhstan. Trican's base in Algeria is in Hassi Messaoud. The company's United States operations are run through bases situated in northern and eastern Texas, Arkansas and western Oklahoma.

#### **Canada**

The company, in Canada, operates in the major sectors of the oilfield pressure pumping services industry including: cementing; fracturing, including coalbed methane (CBM) services; acidizing; deep coiled tubing; nitrogen; geological services; and industrial services. It offers these services to customers from operations bases located across the WCSB. In March 2007, the company acquired all of the shares of CBM Solutions, a privately-owned company based in Calgary, Alberta operating throughout western

Canada and the Rocky Mountain region of the United States. CBM Solutions specializes in the provision of geological and engineering services for unconventional gas wells, including gas content analysis, reservoir characterization and consulting services for coalbed methane and shale gas wells.

## Russia

The company operates in Russia under the name Newco Well Services LLC (Newco). Newco provides cementing services to a variety of customers in the Tyumen region of western Siberia.

## United States

The company, in the United States, operates under the name Liberty Pressure Pumping LP (Liberty). Liberty provides primarily fracturing services in Texas, Louisiana, Arkansas and Oklahoma. Liberty has operating bases in Springtown and Longview, Texas; Searcy, Arkansas and Woodward, Oklahoma. Liberty has a platform in the major shale plays in the southern United States and operates a fracturing fleet with 188,000 HHP. This capacity is divided into eight crews operating out of four bases: four fracturing crews out of a base in Springtown, Texas which is located in the Barnett Shale; two fracturing crews out of Longview, Texas, performing work in the Haynesville Shale in Louisiana and on other deep gas fields in East Texas; and one fracturing crew in Searcy, Arkansas, working primarily on the Fayetteville Shale. In 2008, the company opened a fourth base in Woodward, Oklahoma. This base has one fracturing crew that works on the Woodford Shale and other oil and gas wells in the region. The company also offers cementing and nitrogen services in Longview and acidizing services in Woodward.

## North Africa (Algeria)

In Algeria, the company operates out of one base in Hassi Messaoud. The company runs one coiled tubing unit, one nitrogen pumper and one twin fluid pumper in the region.

## Industrial Services

Industrial Services offers engineered solutions and services to oil sands, heavy oil, refinery, petrochemical, gas process, power generation, mining and pipeline facilities. Specialty services include mechanical and chemical descaling and passivating of

process facilities, pipelines and storage tanks. Engineered services also include nitrogen displacement of pipelines and process facilities, nitrogen cooling and warming of process reactors, and pressure testing and leak detection of pipelines and process facilities. The company offers services to industrial plants, oil and gas facilities and pipeline operations. These include the mechanical or chemical descaling and cleaning of industrial plants, the inerting and purging of plants and pipelines with nitrogen, and pressure testing of vessels and pipelines.

## Competition

The company's competitors in the well service market in Canada, the United States and Russia include B.J. Services Ltd., Halliburton Energy Services, Schlumberger Incorporated, Calfrac Well Services Ltd., and CATCO Engineering AG.

## History

Trican Well Service Ltd. was founded in 1979.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
