Trinity Biotech plc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Trinity Biotech plc and its competitors. This provides our Clients with a clear understanding of Trinity Biotech plc position in the **Healthcare Equipment and Supplies Industry**.

- The report contains detailed information about Trinity Biotech plc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.
- Another part of the report is a SWOT-analysis carried out for Trinity Biotech plc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.
- The Trinity Biotech plc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes Trinity Biotech plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Trinity Biotech plc business.

About Trinity Biotech plc

Trinity Biotech plc develops, acquires, manufactures, and markets medical diagnostic products for the clinical laboratory and point-of-care (POC) segments of the diagnostic market in the United States. It also provides raw materials to the life sciences industry.

Principal Products

The company develops, acquires, manufactures, and markets a range of clinical in-vitro diagnostic products.

Clinical Laboratory

The company supplies the clinical laboratory segment of the market with a range of diagnostic tests and instrumentation which detect infectious diseases, sexually transmitted diseases, blood coagulation and autoimmune disorders. The company also sells raw materials to the life sciences industry. Within the clinical laboratory product line, there are three product portfolios, namely coagulation, infectious diseases, and clinical chemistry.

Coagulation: The coagulation product line comprises test kits and instrumentation used in the detection of blood coagulation and clotting disorders. The product offering is marketed globally to hospitals, clinical laboratories, commercial reference laboratories, and research institutions. The company has launched the Destiny MAX instrument, which is specifically designed to service the high throughput segment of the market.

Infectious Diseases: The company's infectious diseases products are used to perform tests on patient samples and the results generated are reported to physicians to guide diagnosis for a range of infectious diseases. This product line includes diagnostic kits for autoimmune diseases (lupus, celiac, and rheumatoid arthritis), hormonal imbalances, sexually transmitted diseases (syphilis, Chlamydia, and herpes), intestinal infections, lung/bronchial infections, cardiovascular, and a range of other diseases.

Clinical Chemistry: The company's speciality clinical chemistry business includes reagent products, such as ACE, Bile Acids, Lactate, Oxalate and Glucose 6 phosphate dehydrogenase (G6PDH). These products are suitable for both manual and automated testing and have performance in the diagnosis of various disease states from liver and kidney disease to G6PDH deficiency which is an indicator of haemolytic anaemia. The company, through Primus Corporation (Primus), offers in-vitro diagnostic testing for haemoglobin A1c used in the monitoring of diabetes. Primus manufactures a range of instrumentation using patented HPLC (high pressure liquid chromatography) technology. These products are the methods available for detection and monitoring the patient status and overall diabetic control. The Primus product range also includes HPLC equipment specifically designed to detect haemoglobin variants which is important for screening populations for genetic abnormalities that can lead to conditions, such as sickle cell anaemia. Primus sells products to physicians' offices and reference laboratories directly in the U.S.A and via a distribution network in other countries. In addition, the company developed the GeneSys system for assay and detection of Haemoglobin variants in neo-natal screening. Primus is also involved in the development of a new HPLC instrument to replace the PDQ analyzer.

Point of Care (POC)

Point of Care refers to diagnostic tests which are carried out in the presence of the patient. The company's range of POC tests principally test for the presence of HIV antibodies. Its principal product is UniGold HIV. UniGold HIV has been used in voluntary counselling and testing centres (VCTs) in sub-Saharan Africa where they provide a cornerstone to early detection and treatment intervention. In the U.S.A, the Centres for Disease Control (CDC) recommend the use of rapid tests to control the spread of HIV/AIDS. As part of this, UniGold HIV is used in public health facilities, hospitals and other outreach facilities. It has received clearance on the TRIstat point-of-care system, which would be used in physician laboratories, diabetes clinics, and health centres for the determination of Haemoglobin A1c. The TRIstat system is undergoing the completion of CLIA (Clinical Laboratory Improvement Act) clinical trials for the definition of ease of use. The company also offers Uni-Gold LUA kit. The product is a lateral flow test for the qualitative detection of Legionella pneumophila in urine from patients with symptoms of pneumonia.

Sales and Marketing

The company markets its portfolio of approximately 500 products to customers in 75 countries worldwide,

with the focus on North America, Europe and Asia. It has direct sales forces in the United States, Germany, France, and the United Kingdom.

Competition

The company's competition includes companies, such as Roche Diagnostics; Abbott Diagnostics; Johnson & Johnson; Siemens; Beckman Coulter; Inverness Medical Innovations, Inc.; Bio-Rad; Diasorin Inc.; Diagnostic Products Corp.; OraSure Technologies, Inc.; and Thermo Fisher.

History

Trinity Biotech plc was founded in 1992.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
