Abstracts

TriQuint Semiconductor, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between TriQuint Semiconductor, Inc. and its competitors. This provides our Clients with a clear understanding of TriQuint Semiconductor, Inc. position in the [Semiconductor](#) Industry.

The report contains detailed information about TriQuint Semiconductor, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for TriQuint Semiconductor, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The TriQuint Semiconductor, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes TriQuint Semiconductor, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TriQuint Semiconductor, Inc. business.

About TriQuint Semiconductor, Inc.

TriQuint Semiconductor, Inc. supplies modules, components, and foundry services to the communications companies worldwide. The company designs, develops, and manufactures radio frequency (RF) solutions with Gallium Arsenide (GaAs), Gallium Nitride (GaN), Surface Acoustic Wave (SAW), and Bulk Acoustic Wave (BAW) technologies for customers worldwide.

Products

The company offers an array of filtering, switching, and power products for RF, microwave, and millimeter-wave applications. The company utilizes specialized substrate materials and technologies such as pHEMT, GaN HEMT, heterojunction bipolar transistors (HBT), Metal-Semiconductor Field Effect Transistor (MESFET), SAW, and BAW to design and manufacture products which improve the performance of its customers' applications.

The company's range of standard and customer-specific integrated circuits, components and modules, and SAW and BAW duplexers and filters, combined with its manufacturing and design services, allow customers to select the specific product solution that fulfills their technical and time-to-market requirements. The company's

services in this area include design consulting, wafer fabrication, test engineering, package engineering, assembly and test.

Mobile Devices

The company's mobile device products include transmit modules, power amplifier modules, power amplifier-duplexer modules, duplexers, switches, integrated products and other products to meet the needs of the global communications marketplace. The company's products support 2G, 3G and 4G standards (GSM, GPRS, EDGE, CDMA, EV-DO WCDMA, HSPA, WEDGE, WGPRS, LTE, WLAN and others) and can be found across this wide frequency spectrum.

Networks

The company's networks division addresses four primary markets focused on wireless client connectivity, base station, transport and emerging markets. Wireless client consists of products sold for client and/or Customer Premise Equipment (CPE) wireless connectivity. WLAN and WIMAX for laptop computers represent the majority of this market. Base station includes its products used in all cellular 2G, 3G, and 4G standards of base transceiver stations (BTS). This includes network applications, such as point-to-point radio, cable or CATV, optical networking and non-military satellite based communication. The company's emerging markets and 'other' products include all products which do not fit into its handset or defense and aerospace markets, or into the wireless client, base station or transport segments of its networks market. Products classified as 'other' include its automotive, test equipment, radio-frequency identification (RFID) and medical, as well as multi-market standard products.

Defense and Aerospace

The company's defense and aerospace devices—including packaged products, die-level ICs, MMICs, multi-chip modules—are used in diverse communications and phased array radar programs. These programs include ship-based, airborne and battlefield systems, as well as sat-com, electronic warfare, and guidance applications.

The company has developed a family of discrete RF transistors called PowerBand that provide wideband applications designers while simultaneously delivering high power performance across a bandwidth: 500MHz to 3GHz.

Sales and Marketing

In the U.S., the company has design and manufacturing facilities in Oregon, Texas, and Florida with additional design facilities in Colorado, Massachusetts, California, and North Carolina, as well as sales support offices in various locations. In addition the company has application sales support offices in China, Finland, France, Germany, Israel, Japan, Korea, Malaysia, Sweden, Taiwan and the United Kingdom.

Markets

The company focuses on three end markets in the electronic communications system industry: mobile devices, networks and defense and aerospace applications.

Customers

The company has a customer base of systems manufacturers. Its customers include Futaihua Industrial (Shenzhen) Co Ltd, a sister company of Foxconn; Samsung; and Motorola.

Competition

The company, for its integrated modules, competes primarily with the following competitors: Anadigics Inc., Avago, Inc., Eudyna, Inc., Raytheon Co., RF Micro Devices, Inc., Skyworks Solutions, Inc., Phonon Corp., RF Monolithics, Inc., TDK and EPCOS AG, Murata Manufacturing Co., and Panasonic Corp.

History

TriQuint Semiconductor, Inc. was founded in 1981.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
