Abstracts

Triumph Group, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Triumph Group, Inc. and its competitors. This provides our Clients with a clear understanding of Triumph Group, Inc. position in the [Aerospace and Defense](#) Industry.

The report contains detailed information about Triumph Group, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Triumph Group, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Triumph Group, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Triumph Group, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Triumph Group, Inc. business.

About Triumph Group, Inc.

Triumph Group, Inc., through its subsidiaries, engages in the design, engineering, manufacture, repair, overhaul, and distribution of aircraft components. The company primarily offers hydraulic, mechanical and electromechanical control systems, aircraft and engine accessories, structural components and assemblies, non-structural composite components, thermal acoustic insulation systems, auxiliary power units (APUs), avionics and aircraft instruments.

The company serves a range of the aerospace industry, including original equipment manufacturers, or OEMs, of commercial, regional, business and military aircraft and components, as well as commercial airlines and air cargo carriers.

Products and Services

The company offers various products and services to the aerospace industry through two groups of operating businesses, including Triumph Aerospace Systems Group, whose companies design, engineer and manufacture a range of proprietary and build-to-print components, assemblies and systems for the global aerospace OEM market; and Triumph Aftermarket Services Group, whose companies serve aircraft fleets, notably commercial airlines, the U.S. military and cargo carriers, through the maintenance,

repair and overhaul of aircraft components and accessories manufactured by third parties.

The company's Aerospace Systems Group utilizes its capabilities to design, engineer, and build metallic structural assemblies, as well as mechanical, electromechanical, hydraulic, and hydromechanical control systems. Customers typically return such systems to the company for repairs and overhauls and spare parts. This group also includes companies performing manufacturing, machining and forming processes for a range of structural components, as well as assemblies and subassemblies. This group services the full spectrum of aerospace customers, which include aerospace OEMs and the manufacturers who supply them and airlines, air cargo carriers, and domestic and foreign militaries.

The products that companies within this group design, engineer, build and repair include acoustic insulation systems; aircraft and engine mounted accessory drives; cockpit control levers; composite and metal bonding; composite ducts and floor panels; control system valve bodies; exhaust nozzles and ducting; floor beams; heat exchangers; high lift actuation; landing gear actuation systems; landing gear components and assemblies; main engine gear box assemblies; primary and secondary flight control systems; stretch-formed edges and fuselage skins; windows and window assemblies; and wing spars and stringers.

The company's Aftermarket Services Group performs maintenance, repair and overhaul services (MRO) and supplies spare parts of various types of cockpit instruments, and gauges for the commercial and military aviation industry and primarily services the world's airline and air cargo carrier customers. This group also designs, engineers, manufactures, repairs and overhauls aftermarket aerospace gas turbines engine components, offers MRO solutions, leasing packages, exchange programs and parts and services to airline, air cargo and third party overhaul facilities. Some specialties include navigation, flight, and engine monitoring instruments, as well as autopilots, voice and data recorders, smoke detection systems and aircraft lighting. Companies in its aftermarket services group repair and overhaul various components for the aviation industry, including air cycle machines; APUs; cockpit instrumentation; constant speed drives; engine and airframe accessories; flight control surfaces; integrated drive generators; mechanical, hydraulic and electrical hardware items including gearboxes, cargo hooks and vibration absorbers; nacelles; remote sensors; thrust reversers; blades and vanes; cabin interior panes, shades, light lenses and other plastic components; combustors; stators; transition ducts; sidewalls; light assemblies; and overhead bins.

Acquisitions

In March 2010, the company acquired Triumph Fabrications—St. Louis. Through the addition of Triumph Fabrications—St. Louis, it added maintenance and manufactured solutions focused on aviation drive train, mechanical, hydraulic, and electrical hardware items, including gearboxes, cargo hooks and vibration absorbers. Triumph Fabrications—St. Louis also produces fabricated textile items, such as seat cushions and sound insulation blankets for military rotary-wing platforms.

Customers

The company's major customer is the Boeing Company.

History

Triumph Group, Inc. was incorporated in 1993.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
