## Abstracts

TT Electronics plc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between TT Electronics plc and its competitors. This provides our Clients with a clear understanding of TT Electronics plc position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about TT Electronics plc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for TT Electronics plc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The TT Electronics plc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes TT Electronics plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TT Electronics plc business.

## **About TT Electronics plc**

TT Electronics plc engages in the development, distribution and manufacture of electronic, electromechanical and electrical products. The company supplies its products to the major manufacturers in the automotive, telecommunications, computing and industrial electronics markets worldwide. The company's operates in two divisions, including Electronics and Electrical.

### **Electronics Sector**

#### **Automotive Sensors and Electronic Systems**

TT electronics specializes in the manufacture of sensors and electronic systems for major automotive customers across the world. The company provides Powertrain, Chassis, Comfort and Convenience, Safety, and Components and Technologies products in this segment. These products are supplied to Original Equipment Manufacturers and to Tier 1 and 2 manufacturers and include full drive by wire ETC products, climate control systems, electronic power assisted steering sensors and other integrated modules.

#### **Electronic Components and Magnetics**

TT electronics provides both active and passive component solutions for its customers. TT electronics' companies manufacture a range of passive components and Hybrid Microcircuits found worldwide. The passive components include fixed and variable resistors, specialist resistor networks incorporating capacitors, diodes and inductors, a range of magnetic components and a specialized range of units for the automotive market. Hybrid Microcircuits include thick and thin film styles with a wide range of added components and encapsulation technologies. The markets served include Automotive, Industrial / Instrumentation, Telecommunications, Computing, Defense / Avionics and Medical.

The company's products in this segment include Fixed resistors, Resistor Networks, Trimmers, Potentiometers, Hybrid Microcircuits, and Magnetic Components.

### Optoelectronic Components

Optek Technology: OPTEK Technology is a supplier of optoelectronic products for sensing, illumination and indication applications. It provides optoelectronic sensors found in a multitude of applications that includes office equipment, industrial applications, encoders, military and Hi-Rel applications, medical diagnostic equipment and the like. Its Hall-Effect and Magnetoresistive components are used in the automotive industry for engine controls and ignition security. OPTEK also offers the datacom world its technology to manufacture Fiber Optic components found on both the factory floor, and today's high-end automobiles.

OPTEK's visible LED product offering spans the visible spectrum from ultraviolet (380nm) to infrared (935nm). Its high brightness LEDs satisfy the requirements in automotive applications, signage, general illumination and mobile appliances.

### Magnetic Materials

TT electronics' Magnetics Division produces magnetics materials available from any single worldwide supplier. The product range includes ferrites, magnets, extrusions and pressings.

### Printed Circuit Boards

TT electronics, through its subsidiary Prestwick Circuits, is one of the major manufacturers of printed circuit boards in Europe.

## Electronic Manufacturing Services

TT electronics is an electronic manufacturing services provider to United Kingdom, European, North American and Chinese customers. The company also provides a specialized manufacturing support and logistics service to its customers.

TT electronics Manufacturing Services (TT EMS, Ltd.) comprises two contract electronic manufacturers – AB Electronic Assemblies in Rogerstone, South Wales and Welwyn Systems Ltd in Blyth, Northumberland. Both companies provide a specialized design and test service with their range of surface mount and through hole assemblies.

## Electrical Sector

TT electronics provides power in the form of generators and uninterruptible power supply units, manufactured in the United Kingdom and Mexico, for customers responsible for major power projects worldwide.

TT electronics provides a variety of electrical products for power and data transmission applications within traditional markets in the United Kingdom, Africa and the Far East. The company also engages in the connector business in the European and North American ma

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
