The Tufco Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tufco Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tufco Technologies Inc. business.

About Tufco Technologies Inc.

Tufco Technologies, Inc. provides integrated manufacturing services in the United States. The company also engages in the manufacture and distribution of business imaging paper products.

Segments

The company markets its products and services through two market segments: contract manufacturing services and business imaging paper products.

Contract Manufacturing

The company has contract manufacturing capability at its Green Bay, Wisconsin location. Its products manufactured and services provided at its Green Bay, Wisconsin facility include wet and dry wipe converting, wide Web flexographic printing, hot melt adhesive laminating, folding, integrated downstream packaging, and quality and microbiological process management. The facility contract manufactures products from materials, including polyethylene films, various nonwovens, paper, and tissue. Its products include disposable wet and dry wipes for home, personal/baby/medical care

use, flexible packaging, and disposable table covers.

The company's Green Bay, Wisconsin facility also offers Web flexographic printing services. It offers 8-color, high resolution, wide Web flexographic printing and focuses on products, such as paper and poly table covers, flexible packaging used in retail products, such as food, soda, overwraps, and nonwovens which are used in feminine care, home cleaning, and baby diaper products. It has two 8-color flexographic printing presses capable of printing solvent and water-based inks, 62' print width at speeds up to 1,500 feet per minute and offers repeat sizes ranging from 15-3/4' to 47-1/4'. The Green Bay flexographic presses would print on media from tissue or nonwoven to heavyweight paperboard, films, and foils.

Business Imaging

The company's Newton, North Carolina facility has capabilities which include precision slitting, rewinding, specialty packaging, folding, perforating, and trimming of paper rolls in various sizes which include variables in width, diameter, core size, single or multi-ply, and color. Its capabilities are directed toward converting fine paper materials, including specialty and fine printing papers, thermal papers, inkjet papers, and coated products.

The company's Newton, North Carolina facility converts papers for use in bank proof or automated teller machines, including fan-fold forms, and printed rolls of various sizes and types. Additionally, its Newton facility produces guest checks for use in the restaurant industry and owns equipment which enables this facility to produce various multi-part business forms.

The company distributes from its Newton and Las Vegas facilities various printed and unprinted paper products used in business imaging equipment in market segments, including architectural and engineering design, high speed data processing, point of sale, automatic teller machines, and various office equipment. Its products include roll products ranging in length from 30 feet to 3,500 feet and in widths from 1 inch to 54 inches.

The company's products are available in paper grades, including various weights of bond paper, thermal imaging papers, fine vellums, and multi-part forms. It also has a line of products for the restaurant market, including children's placemats, crayons, and guest checks.

Customers

The company's customer base consists of multinational consumer products companies and dealers, and distributors of business imaging papers.

History

Tufco Technologies, Inc. was founded in 1974.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
