The Tutor Perini Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tutor Perini Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tutor Perini Corporation business.

About Tutor Perini Corporation

Tutor Perini Corporation, together with its subsidiaries, operates as a construction services company offering diversified general contracting, construction management, and design-build services to private clients and public agencies in the United States and internationally. It also offers self-performed construction services, including site work, concrete forming and placement, steel erection, electrical and mechanical, plumbing, and HVAC.

Segments

The company's business is conducted through three primary segments: Civil, Building, and Management Services.

Civil segment

Civil segment specializes in public works construction and the repair, replacement and reconstruction of infrastructure, primarily in the western, northeastern, and mid-Atlantic United States. The company's civil contracting services include construction and rehabilitation of highways, bridges, mass transit systems, and wastewater treatment facilities.

Civil segment comprises Tutor Perini Civil Construction, Tutor-Saliba Corporation (Tutor-Saliba), and Cherry Hill Construction, Inc. (Cherry Hill) and focuses on public works construction, including the new construction, repair, replacement and reconstruction of the public infrastructure such as highways, bridges, mass transit systems, and wastewater treatment facilities.

The company completed or is working on some of the most significant civil construction projects in the United States. The company is working on rehabilitation of the Tappan Zee Bridge in Westchester County, New York; the John F. Kennedy International Airport runway widening in Queens, New York; portions of the Port Authority of New York and New Jersey Greenwich Street corridor project in New York, New York; the I-5 Bridge replacement in Shasta County, California; the Caldecott Tunnel Project near Oakland, California; the Route 9 Bridge replacement in Peekskill, New York; the Harold Structures mass transit project in Queens, New York; and the construction of express toll lanes along I-95 in Maryland. The company completed work on multiple portions of the Boston Central Artery/Tunnel project; New Jersey Light Rail Transit; the Richmond/San Rafael Bridge retrofit in California; the Alameda Corridor project in California; rehabilitations of the Triborough, Williamsburg and Whitestone Bridges in New York and the Passaic River Bridge in New Jersey; the Jamaica Station Transportation Center in New York; and sections of both the Brooklyn-Queens Expressway and the Long Island Expressway.

The company owns Cherry Hill that specializes in excavation, foundations, paving, and construction of civil infrastructure. The company's subsidiary, Tutor-Saliba, is an established civil construction contractor specializing in mass transit, airport, bridge, and waste water treatment projects in the western United States.

Building segment

This segment focuses on large, complex projects in the hospitality and gaming, transportation, healthcare, municipal offices, sports and entertainment, education, correctional facilities, biotech, pharmaceutical, industrial, and high-tech markets, and electrical and mechanical, plumbing, and HVAC services as a subcontractor to the company and other general contractors. Building segment comprises Perini Building Company, James A. Cummings, Inc. (Cummings), Rudolph, and Sletten, Inc. (Rudolph and Sletten), Keating Building Company (Keating), Desert Plumbing & Heating Company, Inc., and Powerco Electric Corporation.

The company is working on contracts for various marquee projects in the hospitality and gaming market in Las Vegas, including Project CityCenter for MGM MIRAGE, The Cosmopolitan Resort and Casino, the Wynn Encore Hotel and the Planet Hollywood Tower. The company also completed work on other marquee projects in the hospitality and gaming market, including Paris Las Vegas; Mohegan Sun and the MGM Grand at Foxwoods resort expansion, both in Connecticut; the Morongo Casino Resort and Spa and the Pechanga Resort and Casino, both in California; the Seminole Hard Rock Hotels and Casinos in Florida; the Red Rock Casino Resort Spa, the Augustus Tower at Caesars Palace, the Trump International Hotel an

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
