The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TVI Pacific Inc. business.

About TVI Pacific Inc.

TVI Pacific Inc. engages in the acquisition, exploration, and development of polymetallic mineral deposits in the Philippines.

The company's principal producing assets are located in the Philippines, including the Canatuan Mine, which produces gold and silver dore, and a royalty interest in the Rapu Rapu Mine. It also holds a portfolio of properties and land positions in the Philippines, including the Balabag gold project. In addition, the company holds a portfolio of properties and land positions in the Philippines, known as the North Zamboanga tenements. It also owns a contract drilling business, which is being marketed for sale.

Canatuan

The Canatuan property is located in the Zamboanga del Norte province of the Philippines. The property consists of five claim blocks, one of which is held under a Mineral Production Sharing Agreement (MPSA) issued in its name by the DENR, two of which are held under applications for MPSA's, and the remaining two of which are held as Exploration Permit Application's (EPA) for a total land package of approximately 35,211 hectares.

Balabag Gold Project (ZMC MPSA-086-97-IX)

The Balabag epithermal gold project is an advanced-stage exploration project located near the municipalities of Bayog, Zamboanga Del Sur, and Diplahan, Zamboanga Sibugay, in the Philippines, approximately 75 km east-northeast of TVIRD's producing Canatuan Mine. The tenements covering the Balabag property comprise a MPSA and have a total area of 4,779 hectares. The MPSA is located near the municipalities of Bayog, Zamboanga Del Sur, and Diplahan, Zamboanga Sibugay, on the Island of Mindanao, Philippines.

Tamarok Copper-Gold Porphyry (Dalman) and Tapisa (Afta-013-Ix)

The property is located 50 kilometres southwest of Dipolog, Mindanao, Philippines at Sitio Supot, Barabgay Tamarok, Jose Dalman Municipality, Zamboanga del Norte.

Rapu Rapu

The Rapu Rapu mine, located in the province of Albay in central eastern Philippines, is a polymetallic mining project. The company assigned to Lafayette Group its mining rights and participating interest in the Rapu Rapu Joint Venture Agreement.

History

TVI Pacific Inc. was founded in 1987.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
