Abstracts

TE Connectivity Ltd Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between TE Connectivity Ltd and its competitors. This provides our Clients with a clear understanding of TE Connectivity Ltd position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about TE Connectivity Ltd that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for TE Connectivity Ltd. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The TE Connectivity Ltd financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes TE Connectivity Ltd competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of TE Connectivity Ltd business.

About TE Connectivity Ltd

Tyco Electronics Ltd. provides engineered electronic components, network solutions, undersea telecommunication systems, and wireless systems.

Segments

ELECTRONIC COMPONENTS

Electronic Components segment offers connectors and interconnect systems, relays, switches, sensors, and wire and cable.

Connector Systems and Components: The company offers a range of electrical and electronic interconnection products. These connectors include a range of pin and socket, terminal, USB, coaxial, I/O, fiber optic, and power connectors, as well as interconnection products used in complex telecommunications and computer equipment.

Relays: The company's relay products would be used in a range of applications in the automotive, telecommunications, and industrial industries, including electric sunroofs,

anti-lock braking systems, and fuel injection coils for the automotive industry and signal and power relay technologies for the telecommunications industry.

Heat Shrink Tubing: The company offers products to seal, connect, insulate, protect, hold, and bundle electrical harnesses. It also provides customized harnessing design, prototype, and build services.

Fiber Optics: The company manufactures fiber optic connectors, cable assemblies, adapters, and accessories. It provides products that connect, configure, and control light.

Application Tooling: The company offers a portfolio of hand tools, semi-automatic bench machines, and fully-automatic machine systems for processing terminal products.

NETWORK SOLUTIONS

Network Solutions segment supplies infrastructure components and systems for telecommunications and energy markets. These components include connectors, above- and below-ground enclosures, heat shrink tubing, cable accessories, surge arrestors, fiber optic cabling, copper cabling, and racks for copper and fiber networks. This segment also provides electronic systems for test access and intelligent cross-connect applications, as well as integrated cabling solutions for cabling and building management.

Connector Systems and Components: The company offers a range of low, medium, and high-voltage connectors and splices, cable assemblies, sealing systems, terminals, fittings, lugs, and clamps, transmission line fittings, splice closures, grounding hardware, and wall and floor outlets for voice and data connection to local area networks.

Heat Shrink Tubing: The company offers heat shrink tubing, heat-shrinkable splice closures, wrap-around sleeves, and molded parts designed to better protect both high- and low-voltage circuits against harsh aerial, buried, and above-ground environments.

Fiber Optics: The company provides fiber optic connectors, splices, fiber optic splice closures, fiber management systems, high density cable assemblies, couplers and splitters, and complete cabling systems. These products find use in both local-area and wide-area networks, and emerging 'Last-Mile' Fiber-to-the-Home installations.

Wire and Cable: The company provides wire and cable for indoor and outdoor use in

office, factory floor, school, and residential voice, data, and video networks, including copper and fiber optic distribution cables, shielded and unshielded twisted-pair cables, armored cable, and patch cords.

Racks and Panels: The company provides racks and panels that are used to integrate, organize, and manage fiber and copper cables and splices, thereby simplifying installation, maintenance, and upgrades for both exchange/head end and customer premise environments. It also sells insulators, surge arrestors, power measurement products, CATV accessories, network interface devices, raceway systems, and duct accessories.

SPECIALTY PRODUCTS

This segment provides highly-engineered custom solutions, components, and connectors for electronic systems, subsystems, and devices in the aerospace, defense, and marine; touch systems; medical; and circuit protection markets.

Connector Systems and Components: The company offers connector products, including a range of pin and socket, terminal, USB, coaxial, I/O, fiber optic, and power connectors, as well as interconnection products used in complex aerospace and def

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
