term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tyco International Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tyco International Ltd. business.

About Tyco International Ltd.

Tyco International Ltd. provides security products and services, fire protection and detection products and services, valves and controls, and other industrial products.

Segments

The company's segments include ADT Worldwide, Flow Control, Fire Protection Services, Electrical and Metal Products, and Safety Products.

ADT Worldwide

ADT Worldwide segment designs, sells, installs, services, and monitors electronic security systems for residential, commercial, educational, governmental and industrial customers worldwide. Its market area includes North and South America, Europe, and the Asia-Pacific region.

In May 2010, the company acquired Brink's Home Security Holdings, Inc., which provides security alarm monitoring services for residential and commercial properties in North America.

Services and Products

ADT Worldwide supplies and installs electronic security systems to the residential, commercial, educational, governmental, and industrial markets. It also provides electronic security services, including monitoring of burglar alarms, fire alarms and other life safety conditions, as well as maintenance of electronic security systems.

The company's electronic security systems business involves the installation and use of security systems designed to detect intrusion, control access, and react to movement, fire, smoke, flooding, environmental conditions, industrial processes, and other hazards. These electronic security systems include detection devices that are usually connected to a monitoring center that receives and records alarm signals where skilled security monitoring specialists verify alarm conditions and initiate a range of response scenarios. For most systems, control panels identify the nature of the alarm and the areas where a sensor was triggered. The company's other solutions include access control systems for sensitive areas, such as government facilities and banks; video surveillance systems designed to deter theft and fraud and help protect employees and customers; and asset protection and security management systems designed to monitor and protect physical assets, as well as proprietary electronic data. Its offerings also include anti-theft systems utilizing acousto magnetic and radio frequency identification (RFID) tags and labels in the retail industry.

Customers

ADT Worldwide sells to residential, commercial, educational, governmental and industrial customers. The company's residential customers typically include owners of single-family homes or renters in multi-family apartment complexes. Its commercial customers include retail businesses, financial institutions, commercial/industrial facilities, and health care facilities. Its government customers include federal, state and local governments, defense installations, schools and mass transportation providers. In addition to advertising, direct mailings and the Internet, the company markets its electronic security systems and services to these customers.

Flow Control

Flow Control designs, manufactures, sells and services valves, pipes, fittings, valve automation and heat tracing products for general process, energy and mining markets, as well as the water and wastewater market. Its market area includes the Middle East, and Africa, Americas, the Pacific region, and Asia.

Services and Products

Flow control designs and manufactures various valves, actuators, controls, pipes, fittings, and heat tracing products. Valve products include various industrial valves, including on-off valves, safety relief valves, and other specialty valves. Actuation products include pneumatic, hydraulic, and electric actuators. Control products include limit switches, solenoid valves, valve positioners, network systems, and accessories. For the water market, flow control offers various pipes, valves, hydrants, house connections, and fittings for water transmission and distribution applications. Flow control also provides heat tracing services and products. In addition to these core products, flow control makes various specialty products for environmental (emissions monitoring, water flow and quality monitoring, and dust filter cleaning system

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
