profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Tyler Technologies, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Tyler Technologies, Inc. business.

About Tyler Technologies, Inc.

Tyler Technologies, Inc. provides integrated information management solutions and services for the public sector, with a focus on local governments. The company has a line of software solutions and services to address the information technology (IT) needs of various areas of operation for cities, counties, schools, and other local government entities.

The company provides outsourced hosting for its applications at its data centers through an applications service provider (ASP) arrangement through its subscription-based services. It provides professional IT services to its customers, including software and hardware installation, data conversion, training and, at times, product modifications. In addition, the company provides outsourced property appraisal services for taxing jurisdictions. It also provides continuing customer support services.

Products and Services

The company provides a suite of products and services that address the information technology needs of cities, counties, schools, and other local government entities. Its services include sale of software licenses; subscription-based arrangements; software

services; maintenance and support; and appraisal services.

The company designs, develops, and markets a range of software solutions to serve mission-critical back-office functions of local governments. Its software applications include Internet-accessible solutions that allow for real-time public access to various information or that allow the public to transact business with local governments via the Internet. The company's software solutions and services are generally grouped in three major areas: financial management and education; courts and justice; and property appraisal and tax and other.

The company also offers certain software solutions on a 'software as a service' basis for customers who do not wish to maintain, update and operate these systems or to make up-front capital expenditures to implement these advanced technologies.

Software Licenses

Financial Management and Education

The company's financial management and education solutions are Enterprise Resource Planning systems for local governments, which integrate information across various facets of a client organization. Its financial management solutions include modular fund accounting systems that can be tailored to meet the needs of any government agency or not-for-profit entity. The company's financial management systems include modules for general ledger, budget preparation, fixed assets, requisitions, purchase orders, bid management, accounts payable, contract management, accounts receivable, investment management, inventory control, project and grant accounting, work orders, job costing, GASB 34 reporting, payroll, and human resources. Its financial management systems are intended to conform to government auditing and financial reporting requirements and generally accepted accounting principles.

The company sells utility billing systems that support the billing and collection of metered and non-metered services, along with multiple billing cycles. Its Web-enabled utility billing solutions allow customers to access information online, such as average consumption and transaction history. In addition, its systems can accept secured Internet payments via credit cards and checks.

The company also offers specialized products that automate various city functions, including municipal courts, parking tickets, equipment and project costing, animal licenses, business licenses, permits and inspections, code enforcement, citizen

complaint tracking, ambulance billing, fleet maintenance, and cemetery records management.

In addition to providing financial management systems to K-12 schools, the company offers a student information system for K-12 schools, which manages such applications as scheduling, grades, and attendance. The company also offers student transportation solutions to manage school bus routing optimization, fleet management, field trips, and other related functions. It also offers software applications to manage public sector pension funds.

The company's financial management and education solutions include

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
