Abstracts

UFP Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between UFP Technologies Inc. and its competitors. This provides our Clients with a clear understanding of UFP Technologies Inc. position in the [Packaging and Containers Industry](#).

The report contains detailed information about UFP Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for UFP Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The UFP Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes UFP Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of UFP Technologies Inc. business.

About UFP Technologies Inc.

UFP Technologies, Inc. engages in the design and manufacture of engineered packaging solutions utilizing molded and fabricated foams, vacuum-formed plastics, and molded fiber. The company also designs and manufactures engineered component products using laminating, molding, and fabricating technologies. It serves a myriad of manufacturing sectors and specifically targets opportunities in the medical and scientific, automotive, aerospace and defense, computer and electronics, industrial, and consumer markets.

The company's packaging solutions are made primarily from polyethylene and polyurethane foams, and a range of sheet plastics. Molded fiber products are made primarily from 100% recycled paper principally derived from waste newspaper. These products are custom designed, engineered and molded into shapes for packaging consumer goods, including computer components, light electronics, candles, and health and beauty products.

In addition to packaging solutions, the company fabricates and molds component products made from cross-linked polyethylene foams, reticulated polyurethane foams, and other specialty materials. It also laminates fabrics and other materials to cross-

linked polyethylene foams, polyurethane foams and other substrates. The company's component products include automotive interior trim, athletic padding, industrial safety belts, medical device components, air filtration, high-temperature insulation, abrasive nail files and other beauty aids, anti-fatigue mats, and shock absorbing inserts used in athletic and leisure footwear.

Products

The company's products include foam, plastic, and fiber packaging solutions, and component products.

Packaging Solutions

The company designs, manufactures, and markets a range of packaging solutions primarily using polyethylene, polyurethane, and cross-linked polyethylene foams, and rigid plastics. These solutions are custom-designed and fabricated or molded to provide protection for less durable, higher value items, and are primarily sold to original equipment and component manufacturers. Its packaging solutions include end-cap packs for computers, corner blocks for telecommunications consoles, anti-static foam packs for printed circuit boards, die-cut or routed inserts for cases, molded foam enclosures for orthopedic products, and plastic trays for medical devices and components.

Component Products

The company focuses on engineered products. Its component products are sold primarily to customers in the automotive, sporting goods, medical, beauty, leisure, and footwear industries. These products include automotive interior trim, athletic and industrial safety belts, components for medical equipment and devices, cosmetic applicators, air conditioner filters, abrasive nail files and other beauty aids, anti-fatigue mats, and shock absorbing inserts used in athletic and leisure footwear.

The company has developed various standard products that are branded and, in some cases, trademarked and patented. These products include Wine Packs (wine shipping solutions made from molded fiber); T-Tubes (tube and pipe insulation for clean room environments); BioShell (pharmaceutical bag protection system); and Pro-Sticks (sanitary solution for nail care services).

Sales

The company markets and sells its packaging and component products in the United States principally through direct regional sales forces. It markets a line of products to the health and beauty industry, primarily through distributors.

Customers

The company's customers include Recticel Interiors North America and Stephen Gould Corporation.

History

UFP Technologies, Inc. was founded in 1963.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
