The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Unify Corp. business.

About Unify Corp.

Unify Corporation provides application development, data management, migration, and archiving software solutions worldwide.

Segments

The company sells and markets application development and database software and services, integrated content archiving solutions and modernization solutions through three segments, including the Database and Development Products (DDP), Integrated Content Archiving Solutions, and Modernization and Migration Solutions. The company, through the acquisition of Strategic Office Solutions, Inc. (doing business as Daegis), also delivers eDiscovery solutions for corporate legal departments and law firms.

The company's application development and data management software products include Team Developer, SQLBase, SQLBase Treasury, NXJ, DataServer, VISION and ACCELL. Its Modernization and Migration Solutions include Composer Notes which delivers a like-for-like migration of Lotus Notes applications to the Microsoft .NET platform, Composer Sabertooth which speeds the conversion of Team Developer or SQLWindows applications to Microsoft .NET, Composer CipherSoft which automatically converts Oracle Forms and PL/SQL code to Java and Composer Mainframe which delivers automation migration of legacy COBOL, Ideal and Natural code to modern code

and relational databases through partnerships with Ateras Inc. and Information Analysis Inc. (IAI).

Products

Archive and eDiscovery Solutions

The Central Archive enables corporations to preserve, manage, and utilize their electronically stored information (ESI) as an asset, while managing storage resources, complying with industry regulations, enabling legal discovery and reducing the risks associated with electronic content. The Central Archive, a solution for various forms of electronically stored information, processes various forms of disparate data types into a single unified archive where companies can manage its long-term preservation requirements, apply records management, support regulated industry requirements, and manage legal discovery.

Daegis DocHunter is a dynamic online review platform that hosts electronically stored information (ESI) and provides an array of tools for early case assessment and culling, processing, hosted review, and document production for legal matters. Daegis also provides professional services that include data collection, eDiscovery analytics project management, cost burden analysis, and litigation readiness.

Application Modernization and Migration Solutions

Composer CipherSoft is a software solution that automates the conversion of Oracle Forms and PL/SQL code to Java. Composer CipherSoft provides a like-for-like conversion by preserving the business logic/work flow to avoid end-user disruption. Composer CipherSoft can convert various releases of Oracle Forms, including character-based versions, such as Release 2.3, 3.0 and 4.5. By automating the migration process, Composer CipherSoft removes the risk of human error and produces standardized business applications.

Composer Notes is a software solution for converting IBM Lotus Notes applications to the Microsoft platform. Composer Notes delivers like-for-like migration of Lotus Notes applications to the Microsoft stack while preserving the business logic/workflow to avoid end-user disruption. With Composer, Lotus Notes applications are decomposed and re-assembled: Data from the Lotus Notes application is migrated into a normalized SQL Server database; Business logic is restructured as C# Web Services in Visual Studio; User Interface is transformed into SharePoint Lists and Web Parts; and ACL security is

mapped into the Microsoft Active Directory Services.

Composer Mainframe delivers automation migration of legacy COBOL, Ideal, and Natural code to modern code and relational databases through partnerships with Ateras Inc. and Information Analysis Inc. (IAI). Through the Ateras partnership, Composer Mainframe offers a solution for companies needing to modernize their legacy mainframe applications, including migrating mainframe code, and non-relational databases from IDMS, IMS, VSAM or from Natural / Adabas to COBOL, C# or JAVA code, with either a DB2, SQ

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
