Such information creates your awareness about principal trends of United Community Financial Corp. business.

About United Community Financial Corp.

United Community Financial Corp. operates as the holding company for The Home Savings and Loan Company, which provides consumer and business banking services in Ohio and western Pennsylvania.

The company conducts business from its main office located in Youngstown, Ohio, 39 full-service branches, and 6 loan production offices. Its primary market area consists of Ashland, Columbiana, Cuyahoga, Erie, Franklin, Geauga, Hancock, Huron, Lake, Mahoning, Montgomery, Portage, Richland, Sandusky, Seneca, Stark, Summit, and Trumbull Counties in Ohio and Beaver County in Pennsylvania.

Lending Activities

The company's principal lending activity is the origination of conventional real estate loans secured by real estate located in its primary market area, including single family residences, multifamily residences, and nonresidential real estate, including construction projects. In addition to real estate lending, it originates commercial loans and various types of consumer loans, including home equity loans, loans secured by savings accounts, motor vehicles, boats and recreational vehicles, and unsecured loans.

Loans Secured by One- to Four-Family Real Estate: The company originates conventional loans secured by first mortgages on one- to four-family residences primarily located within its primary market area. It offers fixed-rate mortgage loans and adjustable-rate mortgage loans (ARMs).

Loans Secured by Multifamily Residences: The company originates loans secured by multifamily properties that contain approximately four units.

Loans Secured by Nonresidential Real Estate: The company originates loans secured by nonresidential real estate, such as shopping centers, office buildings, hotels, and motels.

Loans Secured by Vacant Land: The company also originates a limited number of loans secured by vacant land, primarily for the construction of single-family houses.

Construction Loans: The company originates loans for the construction of one- to four-family residences, multifamily properties, and nonresidential real estate projects. Residential construction loans are made to both owner-occupants and to builders on a speculative (unsold) basis.

Consumer Loans: The company originates various types of consumer loans, including home equity loans, vehicle loans, recreational vehicle loans, marine loans, overdraft protection loans, loans to individuals secured by demand accounts, deposits and other consumer assets, and unsecured loans. Consumer loans are made at fixed and adjustable rates of interest and for varying terms based on the type of loan.

Commercial Loans: The company makes commercial loans to businesses in its primary market area, including traditional lines of credit, revolving lines of credit, term loans, and acquisition and development loans. The company also originates unsecured commercial loans, including lines of credit for periods of approximately 12 months, short-term loans and occasionally, term loans for periods of approximately 36 months.

Investment Activities

As of December 31, 2009, the company's investment portfolio included U.S government agencies and corporations; mortgage-related securities; and other securities.

Deposits

The company offers a selection of deposit instruments, including regular passbook savings accounts, demand deposits, individual retirement accounts (IRAs), checking accounts, money market accounts, and certificates of deposit.

History

United Community Financial Corp. was founded in 1889.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
