Abstracts

UniTek Global Services, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between UniTek Global Services, Inc. and its competitors. This provides our Clients with a clear understanding of UniTek Global Services, Inc. position in the Industry.

The report contains detailed information about UniTek Global Services, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for UniTek Global Services, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The UniTek Global Services, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes UniTek Global Services, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of UniTek Global Services, Inc. business.

About UniTek Global Services, Inc.

UniTek Global Services, Inc. provides permanently outsourced infrastructure services, including engineering, construction management, and installation fulfillment services to companies in the telecommunications, broadband cable, wireless, and satellite industries.

Segments

As of December 31, 2009, the company operated in two segments, Infrastructure Construction and Technical Services and Site Acquisition and Zoning.

Infrastructure Equipment Construction and Installation

The company constructs and installs the communications equipment that is necessary to make wireless networks work. Depending on customers' needs, the company is involved in various aspects of site acquisition, construction and installation. Installation of towers could involve clearing sites, laying foundations, bringing in utility lines and installing shelters and towers. Installation of a rooftop site include installing shelters and antennae, bringing in power or installing power systems, and related construction and electrical work.

Radio Transmission Base Station Modification: The company performs cellular base station upgrades and modifications for wireless telecommunications carriers. This work involves upgrades to existing hardware, as well as adding new hardware, such as radios, duplexers, power systems, and site controllers. This work is essential for enhancing network capacity and paving the way to the deployment of new networks using new technologies, including third generation, or 3G, and fourth generation, or 4G, systems.

In-Building Network Design, Engineering and Construction: The company offers complete in-building solutions that involve distributed antennae for wireless coverage in malls, shopping centers, casinos, office buildings and airports.

Project Management: The company also supervises all of the efforts associated with a project, whether it involves one or more of the foregoing services or a 'turn-key' solution, so the carrier can ultimately broadcast from the newly configured site. Project management includes vendor management, project planning and preparation, budget tracking, and engineering and construction coordination.

Specialty Communication Services: Specialty communication services provide enhancements to existing wireless and wired telephone and computer networks designed to improve productivity for a specified application. The company provides microwave systems where voice or video over land lines is not feasible. It also provides 'structured cabling services' to provide voice, data and video over traditional copper and fiber networks.

Site Acquisition and Zoning

The company provides site acquisition services that involve acting as an intermediary between telecommunications companies and owners of real estate and other facilities. It identifies appropriate properties, negotiate the transactions and handle the administrative details. The company also assists in the planning and installation of the telecommunication facilities, and offer customers assistance in acquiring the necessary permits, entitlements and approvals that are required by various municipalities. It also prepares all zoning applications that may be needed, attend any necessary hearings and obtain any required land use permits to begin installation.

Customers

As of December 31, 2009, the company's customers were Clearwire US LLC, T-Mobile (and its subsidiaries), and Ericsson, Inc.

History

The company was founded in 2004. It was formerly known as Berliner Communications, Inc. and changed its name to UniTek Global Services, Inc. in June 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
