The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Univec Inc. business.

### **About Univec Inc.**

Univec, Inc. engages in the production, licensing, and marketing of medical products, primarily syringes, in the United States and internationally. The company, through its subsidiary, Physician and Pharmaceutical Services, Inc. (PPSI), also provides pharmaceutical sample and group purchasing services of pharmaceutical products. The company also distributes regulated pharmaceutical drug, methadone and other prescription drug products.

The company operates its business in two divisions, Syringe Division, and Physician and Pharmaceutical Services Division.

#### **Syringe Division**

The company's Syringe Division develops, licenses and markets auto-disable and safety syringes worldwide. The company also manufactures and markets patented Sliding Sheath Syringes designed to protect patients and healthcare workers from needle stick injuries. The company also developed a Bifurcated Needle Safety Syringe.

The company has developed a 1cc AD-Syringe for aspirating and non-aspirating applications, which are suited for dispensing exact dosages of allergy, immunization and insulin medicines. The company's 1cc AD-Syringe can deliver dosages of

approximately .95cc. The company's 1cc non-aspirating syringe was developed for the needs of immunization programs. The Company can limit its non-aspirating syringe to dosage between .05cc and .95cc. The company's 1cc aspirating syringe works similarly to the non-aspirating model.

### Physician and Pharmaceutical Services Division

The company's Physician and Pharmaceutical Services Division assist pharmaceutical companies in marketing, fulfillment and tracking drug samples through an online system connecting pharmacies and managed payment providers.

### Markets

The company markets its AD-Syringes and Sliding Sheath Safety Syringes to governments of developing countries, provided that such syringes are manufactured in the United States, private hospitals and health facilities in the United States, and distributors in the United States. The company also markets its StarterScript patient prescription sampling services to pharmaceutical companies. The company has exported its 1cc AD-Syringes to approximately 80 countries. The company markets pharmaceutical company drug samples to physicians.

### Competitors

The company's competitors include Becton, Dickinson and Company, Tyco, Terumo, Bader, Caremark and Medco Health.

### History

Univec, Inc. was founded in 1992.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
