company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Uranium Resources, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Uranium Resources, Inc. business.

About Uranium Resources, Inc.

Uranium Resources, Inc. engages in the acquisition, exploration, development, and mining of uranium properties, using the in situ recovery or solution mining process. The company owns both developed and undeveloped uranium properties in South Texas and undeveloped uranium properties in New Mexico. It markets uranium to utilities and commodity brokers.

The company has two licensed in-situ recovery (ISR) processing facilities in Texas: Kingsville Dome and Rosita. It has built an asset base in New Mexico that includes 101.4 million pounds of in-place mineralized uranium material on 183,000 acres of uranium mineral holdings. It also has a license to build a 3 million pound U₃O₈ per year ISR processing facility at Crownpoint, New Mexico. The company also owns a 16.5% royalty interest on a partial section of the Mount Taylor Mine owned by Rio Grande Resources, a division of General Atomics.

Properties

South Texas

The company controls three major properties in the state of Texas, including The

Kingsville Dome, Rosita, and Vasquez properties.

Kingsville Dome: The Kingsville Dome property consists of mineral leases from private landowners on approximately 2,424 gross and 2,227 net acres located in central Kleberg County, Texas.

Rosita: The Rosita property consists of mineral leases from private landowners on approximately 3,377 gross and net acres and the Rosita South property consists of mineral leases from private land owners on approximately 2,130 gross acres and 1,984 net acres located in north-central Duval County, Texas.

Vasquez: The company has a mineral lease on 872 gross and net acres located in southwestern Duval County, in South Texas.

Marshall Exploration Property: The Marshall Property is a Goliad and Oakville prospect consisting of 1953 gross and net acres. It is located in Duval and McMullen counties, Texas.

New Mexico Properties

Churchrock/Mancos: The Churchrock project encompasses approximately 2,200 gross and net acres. The properties are located in McKinley County, New Mexico and consist of 3 parcels, known as Section 8, Section 17, and Mancos.

Crownpoint: The Crownpoint properties are located in the San Juan Basin, 22 miles northeast of its Churchrock deposits and 35 miles northeast of Gallup, New Mexico, adjacent to the town of Crownpoint, New Mexico. The properties consist of 619 gross and 521.8 net acres.

Nose Rock: The Nose Rock property consists of approximately 6,400 acres and is located approximately 12 miles northeast of Crownpoint, New Mexico.

West Largo: The West Largo property comprises 6 contiguous sections of land located in McKinley County, New Mexico approximately 21 miles north of the town of Milan, New Mexico.

Roca Honda: The Roca Honda property comprises 4 sections of land totaling approximately 2,560 acres located approximately 4 miles northwest of the town of San Mateo in McKinley County, New Mexico.

History

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
