term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes URS Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of URS Corporation business.

About URS Corporation

URS Corporation provides engineering, construction, and technical services in the United States and internationally.

Segments

The company operates through three businesses: Infrastructure & Environment; Federal Services; and Energy & Construction.

The Infrastructure & Environment business provides a range of program management, planning, design, engineering, construction and construction management, and operations and maintenance services to various U.S. and international government agencies and departments, as well as to private sector clients.

The Federal Services business provides program management, planning, systems engineering and technical assistance, construction and construction management, operations and maintenance, and decommissioning and closure services to U.S. federal government agencies, primarily the Departments of Defense (DOD) and Homeland Security (DHS).

The Energy & Construction business provides program management, planning, design, engineering, construction and construction management, operations and maintenance, and decommissioning and closure services to U.S. and international government agencies and departments, as well as to private sector clients.

Clients, Market Sectors, and Services

The company, through its network of offices across North America, Europe, the Asia-Pacific, and the Middle East, provides services to a range of domestic and international clients, including U.S. federal government agencies, national governments of other countries, state and local government agencies both in the U.S. and in other countries, and private sector clients representing a range of industries. The company focuses on four market sectors: power, infrastructure, federal, and industrial and commercial.

Market Sectors

Power

The company plans, designs, engineers, constructs, retrofits, and maintains a range of power-generating facilities, as well as the systems that transmit and distribute electricity. Its services include planning, siting and licensing, permitting, engineering, procurement, construction and construction management, facility start-up, operations and maintenance, upgrades and modifications, and decommissioning and closure. The company provides these services to utilities, industrial co-generators, independent power producers, original equipment manufacturers, and government utilities. The company also involves in the development and installation of air technologies that reduce emissions at both new and existing fossil fuel power plants.

The company's project knowledge in the power market sector encompasses services related to the following: fossil fuel power generating facilities; nuclear power generating facilities; hydroelectric power generating facilities; alternative and renewable energy sources, including biomass, geothermal, solar energy, and wind systems; transmission and distribution systems; and emissions control systems.

Infrastructure

The company provides a range of the services required to build, expand, and modernize infrastructure, including surface, air and rail transportation networks; ports and harbors; water supply, treatment and conveyance systems; and many types of facilities. The

company serves as the program manager, planner, architect, engineer, general contractor, constructor, and/or construction manager for various infrastructure projects, and it also provides operations and maintenance services when a project has been completed.

The company's clients in the infrastructure market sector include local municipalities, community planning boards, state and municipal departments of transportation and public works, transit authorities, water and wastewater authorities, environmental protection agencies, school boards and authorities, colleges and universities, judiciary agencies, hospitals, ports and harbors authorities and owners, airport authorities and owners, and airline carriers.

The company's project knowledge in the infrastructure market sector encompasses services related to the following: highways, interchanges, bridges, tunnels and toll road facilities; intelligent transportation systems, such as traffic management centers

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
