Abstracts

US Ecology, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between US Ecology, Inc. and its competitors. This provides our Clients with a clear understanding of US Ecology, Inc. position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about US Ecology, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for US Ecology, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The US Ecology, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes US Ecology, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of US Ecology, Inc. business.

About US Ecology, Inc.

US Ecology, Inc., through its subsidiaries, provides radioactive, hazardous, polychlorinated biphenyl (PCB), and non-hazardous industrial waste management and recycling services to commercial and government entities, such as refineries and chemical production facilities, manufacturers, electric utilities, steel mills, medical and academic institutions, and waste broker / aggregators.

Segments

The company operates within two segments: Operating Disposal Facilities and Non-Operating Disposal Facilities.

Operating Disposal Facilities

The Operating Disposal Facilities accept hazardous, low-activity radioactive material (LARM), and low-level radioactive waste (LLRW); and include its resource conservation and recovery act (RCRA) hazardous waste treatment and disposal facilities in Beatty, Nevada; Grand View, Idaho; and Robstown, Texas; and atomic energy act (AEA) disposal facility in Richland, Washington. Its Washington, Idaho and Texas facilities also accept certain naturally occurring and accelerator produced radioactive material

(NORM/NARM) waste and LARM.

Grand View, Idaho RCRA/ Toxic Substances Control Act (TSCA) Facility: The company's Grand View, Idaho facility is located on 1,252 acres of company-owned land approximately 60 miles southeast of Boise, Idaho in the Owyhee Desert. It owns an additional 159 acres approximately two miles east of the facility, which is used as a clay source for disposal unit liner construction and 189 acres where its rail transfer station is located approximately 30 miles northeast of the disposal site. The disposal facility is permitted to accept hazardous, toxic and non-hazardous waste regulated under RCRA and TSCA. This facility is also permitted to accept certain NORM and NARM radioactive material and LARM exempted from NRC regulation for disposal purposes, including certain 'mixed' hazardous and radioactive waste generated by commercial and government customers, including certain waste received under its USACE contract. The company also treats and delists hazardous electric arc furnace dust (K061) from steel mills.

Robstown, Texas RCRA Facility: The company's Robstown Texas facility is located on 240 acres owned by the company near Robstown, Texas approximately 10 miles west of Corpus Christi. It purchased an additional 200 acres of adjacent land for future expansion. The company also owns 174 acres of non-adjacent land. This facility is permitted to accept hazardous and non-hazardous waste regulated under RCRA. The facility is permitted to accept certain LARM and mixed wastes. It provides hydrocarbon treatment and recycling services using thermal desorption equipment owned and operated by a third party under contract.

Beatty, Nevada RCRA/TSCA Facility: The company's Beatty, Nevada facility is located in the Amargosa Desert approximately 120 miles northwest of Las Vegas, Nevada and approximately 30 miles east of Death Valley, California. USEN leases 80 acres from the state of Nevada for hazardous and PCB waste treatment and disposal operations.

Richland, Washington LLRW Facility: The company's Richland, Washington LLRW facility is located on 100 acres of land leased from the State of Washington on the U.S. Department of Energy Hanford Reservation 35 miles west of Richland, Washington. US Ecology Washington, Inc. (USEW) subleases this property from the State of Washington. The Richland facility is also home to its On-Site Services group, which arranges LLRW and LARM waste packaging, shipment and disposal services.

Non-Operating Disposal Facilities

The Non-Operating Disposal Facilities include its former disposal facilities in Sheffield, Illinois; Beatty, Nevada; and Bruneau, Idaho, and a former hazardous waste processing and deep-well injection operation in Winona, Texas.

Customers

The company serves oil refineries, chemical production plants, steel mills, waste broker-aggregators serving small manufacturers, and other industrial customers. It disposes of LARM and hazardous waste under a contract with the U.S. Army Corps of Engineers (USACE). The company also arranges transportation of waste to its disposal facilities for both government and industry customers. In 2009, its major customer included Honeywell International, Inc.

Competition

The company's primary hazardous waste and PCB disposal competitors are Clean Harbors, Inc., Waste Control Specialists, LLC, and Waste Management, Inc. Its primary radioactive material disposal competitors are EnergySolutions, Inc. and Waste Control Specialists, LLC.

History

The company was founded in 1952. It was formerly known as American Ecology Corporation and changed its name to US Ecology, Inc. in February 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
