Abstracts

US Energy Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between US Energy Corp. and its competitors. This provides our Clients with a clear understanding of US Energy Corp. position in the [Metals and Mining](#) Industry.

The report contains detailed information about US Energy Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for US Energy Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The US Energy Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes US Energy Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of US Energy Corp. business.

About US Energy Corp.

U.S. Energy Corp. engages in the acquisition and development of oil and gas and other mineral properties.

Industry Segments/Principal Products

As of December 31, 2009, the company had three operating segments: Oil and Gas, Real Estate, and Minerals (including Geothermal).

Oil and Gas Segment

As of December 31, 2009, the company's estimated proved reserves were 1,086,203 barrels of oil equivalent (BOE), including oil, natural gas, and natural gas liquid.

Williston Basin: In 2009, the company entered into a drilling participation agreement (DPA) with wholly-owned subsidiary of Brigham Exploration Company. The DPA provides for the company and Brigham to jointly explore for oil and gas in approximately 19,200 gross acres in a portion of Brigham's Rough Rider prospect in Williams and McKenzie Counties, North Dakota. Under its agreement with Brigham, it would earn working interests, out of Brigham's interests, in approximately 15 spacing units

(approximately 1,280 acres each – 2 sections of 640 acres each) in Brigham's Rough Rider project area, which is located in Williams and McKenzie Counties, North Dakota. As of December 31, 2009, six of the initial wells had been completed and were producing.

Texas and Louisiana

With PetroQuest Energy, Inc.: The company has drilled two wells in coastal Louisiana with PetroQuest; one is producing natural gas and oil (it has a 14% working interest and a 9.76% net revenue interest), and the other well drilled with PetroQuest was a dry hole.

With Yuma Exploration and Production Company, Inc: The company has a working interest in a seismic, lease acquisition, and drilling program with Yuma, which covers approximately 88,320 acres in South Louisiana. It holds a 4.79% working interest, Yuma owns an approximate 48% working interest, and the balance (approximately 47.21%) held by third parties program.

With Houston Energy L.P.: The company has participated with Houston Energy in drilling three wells in Southeast Texas and Louisiana; two are producing (it has 8.5% and 25% working interests (6.23% and 17.625% net revenue interests)); and one well was a dry hole.

Minerals Segment

Molybdenum

The company and Thompson Creek Metals Company USA (TCM), a Colorado corporation, entered into an exploration, development and mine operating agreement for its Mount Emmons molybdenum property. The Mount Emmons Project is located in Gunnison County, Colorado. The Mount Emmons Project includes a total of 25 patented and approximately 1,219 unpatented mining and mill site claims, which together approximately 9,311 acres, or approximately 13 square miles of claims.

Royalty on Uranium Claims

The company holds a 4% net profits interest on unpatented mining claims on Rio Tinto's Jackpot uranium property located on Green Mountain in Wyoming.

Renewable Energy — Geothermal

The company owns a 25% minority interest in Standard Steam Trust, LLC (SST), a Denver, Colorado-based private geothermal resource acquisition and development company. Its assets include 4 advanced stage and 4 early stage geothermal projects in the western United States, located on approximately 102,000 acres of U.S. Bureau of Land Management (BLM), state and fee land in 8 prospect areas in 3 states.

Real Estate Segment

The company has interest in a 9 building, 216-unit multifamily apartment complex in Gillette, Wyoming.

Significant Events

In October 2010, US Energy Corp. announced that it has entered into an acquisition, exploration, and development agreement with Cirque Resources LP to acquire a 40% working interest in an oil and gas prospect located in Kern County, California.

History

U.S. Energy Corp. was founded in 1966.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
