term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes US Gold Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of US Gold Corporation business.

## **About US Gold Corporation**

US Gold Corporation, an exploration stage company, engages in the exploration, discovery, development, and extraction of gold, silver and other valuable minerals. The company's core assets are its interests in various exploration properties in the State of Nevada and its properties in Sinaloa State, Mexico.

### **Properties**

#### **Tonkin Complex**

The Tonkin Complex is located on the Cortez Trend, approximately 48 miles by road northwest from Eureka, Nevada. The company has 100% interest in this project.

**Patty Project:** The Tonkin Complex also includes the Patty Project, in which the company holds a non-operating minority interest (30%) and where Barrick Gold U.S. Inc. (Barrick) is manager and holds a 60% interest and the remaining 10% is owned by Chapleau Resources Ltd. The Patty Project is a property (approximately 18.1 square miles) located in the northeast portion of the Tonkin Complex and consists of 544 unpatented mining claims. The company holds mineral interests in the Tonkin Complex through unpatented mining and mill site claims, leases of unpatented mining claims, and

joint venture and other agreements.

**Tonkin North:** The 372 claims covering the area of the property known as Tonkin North are owned by unaffiliated parties and held by the company under a lease agreement.

**Cornerstone Property Lease:** The company holds an interest in the Cornerstone property (106 claims).

### Gold Bar Complex

The Gold Bar Complex is located south of the Tonkin Complex on the continuation of the Cortez Trend. The Gold Bar Complex is in the Roberts Creek Mountains, in Eureka County, Nevada, approximately 30 miles (48 kilometers) northwest of the town of Eureka.

### Limo Property

The Limo Property is located in east-central Nevada, along the eastern portion of Butte Valley and along the western edge of the Cherry Creek Range.

### Battle Mountain Complex

The Battle Mountain Complex is generally located within Humboldt and Lander Counties in the valleys and on the flanks of the mountains surrounding Battle Mountain on the Cortez Trend north of its Tonkin complex.

### Other United States Properties

**Royalty and Earn In Rights:** The mineral properties included in the acquisition of Tone (Roberts Creek, Kobeh, Gold Bar North, South Keystone, Big Antelope Springs, Red Ridge, Fish Creek and Kent Springs) are generally subject to a 1% net smelter return royalty interest in favor of KM Exploration Ltd. Certain properties (Roberts Creek, Kobeh, Gold Bar North, South Keystone and Big Antelope Springs) are also subject to earn-in rights in favor of Teck Cominco American Incorporated (Teck).

**New Pass and Squaw Creek:** White Knight entered into an option agreement on the New Pass and Squaw Creek properties with Consolidated Odyssey Exploration Inc. (Odyssey) whereby Odyssey may earn an initial 50% interest in each property.

## Mexican Properties

The company has property in Mexico which includes the Magistral Mine Property, the Palmarito Project and the El Gallo Project. The company controls mineral concessions of approximately 1,395 square miles (3,613 square kilometers) located in the Mexican states of Sinaloa and Nayarit. The company holds its interests through ownership of Pangea Resources Inc. which in turn holds 100 percent ownership of Compania Minera Pangea S.A. de C.V. (Minera Pangea).

### Magistral Mine Property

The Magistral Mine Property consists of 38 square kilometers (98 square miles) of mineral concessions located in the Sinaloa state, of northwestern Mexico in Mocoltlan Municipality. The project area is located approximately 14 miles (22 kilometers) northeast from the village of Mocoltlan, approximately 25 miles (40 kilometers) northeast from the town of Guamuchil, and approximately 93 miles (150 kilometers) southeast from the city of Los Mochis.

### Palmarito Project

The Palmarito Project is located 7.5 miles (12 kilometers) southwest of US Gold's Magistral Mine in Sinaloa state. Core drilling totaled approximately 1,465 feet (447 m) in 2009.

### El Gallo Project

The El Gallo Project is located 4.7 miles (7.5 kilometers) northwest of the Magistral Mine Property. The El Gallo Project lies within two US Gold-controlled concessions called Rocio Fraccion A and Pangea. These concessions have an area of 86,487 acres and 3,942 acres respectively and are located within the Magistral District property.

## History

The company was founded in 1979. It was formerly known as Silver State Mining Corporation and changed its name to U.S. Gold Corporation in 1988. Further, it changed its name to US Gold Corporation in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
