Abstracts

U.S. Microbics Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between U.S. Microbics Inc. and its competitors. This provides our Clients with a clear understanding of U.S. Microbics Inc. position in the Industry.

The report contains detailed information about U.S. Microbics Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for U.S. Microbics Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The U.S. Microbics Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes U.S. Microbics Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of U.S. Microbics Inc. business.

About U.S. Microbics Inc.

U.S. Microbics, Inc., a business development and holding company, engages in the acquisition, development, and deployment of environmental technologies for environmental cleanup and agriculture yield enhancement using local resources and stimulating regional economies in the United States and developing nations.

The company's subsidiaries manufacture, develop and market proprietary microbial technologies that provide solutions to environmental problems. The company has six wholly owned (directly and indirectly) subsidiaries and those companies are Xyclonyx, West Coast Fermentation Center, Bio-Con Microbes, World Wide Water, Inc., Natural Gas Industries, Inc. and USM Resources Development. Additionally, the company has three majority-owned subsidiaries - Sol Tech Corporation (also known as Wasteline Performance Corporation), USM Capital Group, Inc. and Sub-Surface Waste Management of Delaware, Inc. (SSWM).

Subsidiaries

The company's subsidiaries include Sub-Surface Waste Management of Delaware, Inc. (SSWM), XyclonyX, West Coast Fermentation Center, Inc. (WCFC), Sol Tech, Inc. (d.b.a. 'Wasteline Performance Corporation'), and Bio-Con Microbes, Inc.

USM Solutions Companies XyclonyX

XyclonyX personnel research, develop, formulate, protect, apply, acquire, license and transfer its technologies, consisting of patents, proprietary knowledge, products, processes and personnel, in the environmental, petrochemical, agriculture and waste treatment marketplaces. XyclonyX has developed a formulation for mass producing proprietary microbial blends in liquid form. The principal technology assets of XyclonyX include – Patents and Culture Collection.

West Coast Fermentation Center

WCFC manufactures microbial blends by using fermentation technology, powder blending techniques and combinatorial liquefaction, including microbial blends for the Remediline, Wasteline and Bi-Agra product lines. WCFC operates a microbe laboratory, pilot plant and quality control center. WCFC's primary business is to cultivate microbial cultures that are sold to other subsidiaries of U.S. Microbics and also to third party end users. WCFC manufactures four product lines - BIO-RAPTOR Microbial Application System - added to conventional technology; Wasteline - Anaerobic and Aerobic Waste Treatment Products; Remediline - Hydrocarbon Treatment Products; and Bi-Agra - Agricultural Products, Biological Pesticides, Bio-Dynamic Products.

Sub-Surface Waste Management of Delaware, Inc. (SSWM)

SSWM provides civil and environmental engineering project management services, including specialists to design, permit, build and operate environmental waste treatment systems using conventional, biological and filtration technologies. SSWM is capitalizing on its patented technologies registered in Mexico with SEMARNAT a Federal regulatory agency overseeing environmental compliance nationwide.

SSWM engages in developing, manufacturing and selling engineered remediation solutions for clean up of toxic waste releases to soil and groundwater and the bio-recycling of spent activated carbon filtration media. SSWM provides technical engineering consultation and microbial blends as a subcontractor on projects or executes the work directly as a primary contractor in connection with both ex-situ and in situ processes. SSWM also provides civil and environmental engineering project management services, including specialists to design, permit, build and operate environmental waste clean-up treatment systems using conventional, biological and filtration technologies.

Remediation Services and Products

The company provides engineered remediation solutions for cleanup of toxic waste releases to soil and groundwater. The company also provides ex situ treatment services using its Bio-Raptor system in conjunction with its proprietary microbial blends, providing direct technical engineering consultation as needed. It also uses the process from a U.S. patent for its Bio-GACO system as a liquid and vapor phase waste stream treatment system for the removal of toxics, such as petroleum hydrocarbons, perchlorates and other volatile organic compounds.

The company also use

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
