Abstracts

Valentec Systems, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Valentec Systems, Inc. and its competitors. This provides our Clients with a clear understanding of Valentec Systems, Inc. position in the Industry.

The report contains detailed information about Valentec Systems, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Valentec Systems, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Valentec Systems, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Valentec Systems, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Valentec Systems, Inc. business.

About Valentec Systems, Inc.

Valentec Systems, Inc. operates as an ammunition and systems integration company in the United States. It offers three product lines Systems Management/Integration, Energetic Manufacturing, and Metal Parts Manufacturing. These product lines are operated by Valentec Operating Corp.

Systems Management / Systems Integration

120MM Mortar Weapon System with Electronic Fire Control — 'KESHET': The company has a system contract from Soltam Systems, Inc., for the production and integration of RMS6 120mm Mortar Weapon System for the Israeli Defense Forces using U.S. Foreign Military Financing. Keshet (Hebrew for bow) 120mm self propelled mortar contains command, control and communication devices and offers infantry and armor commander operational capabilities. The program consists of technology transfer, configuration control, procurement, assembly, integration and testing of the 120MM Mortar Weapon System with Electronic Firing Control.

Mortar Ammunition: The company has a systems integration and management contract from Soltam Systems to assemble and deliver mortar ammunition for the IDF using U.S. Foreign Military Financing. The 120mm and 60mm were ordered with two different

explosive fillers each and the 81mm was ordered in a single configuration for a total of five different rounds.

The company's primary suppliers for the Systems Management / Systems Integration projects are: BMJ Belgrade, Herzegovina, Accurate Energetics, McCuen, Medico, POCAL, Lockheed-Martin, Greene Tweed, and Pyrotechnics by Grucci.

Energetic Manufacturing

The company's energetic business includes various flares and simulators with multiple end uses. The flares can be used for illumination and/or signaling. The simulators are used for training purposes to simulate a battlefield environment. The company's primary suppliers are: GOEX, Inc.; ATK; Flexible Concepts; Woodlawn Manufacturing; B & T Screw; and Spaulding Composites.

Metal Parts Manufacturing

The U.S. government metal parts work consists of a contract for 83,508 units of 105MM, M14B4, and Spiral Wrapped Cartridge Case (SWCC). The company's primary suppliers are: Vy-Comp, Shreveport, Northwest Stamping, and Alta Max.

Customers

The company's major customers include Soltam Systems, Inc.; DSE, Inc.; Kingdom of Saudi Arabia; and the U.S. Government.

Competitors

The company's competitors include General Dynamics; Alliant Tech Systems; PSI, Inc.; Martin Electronics; and Lance Ordnance.

History

Valentec Systems, Inc. was incorporated in 1998.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
