The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Vangold Resources Ltd. business.

About Vangold Resources Ltd.

Vangold Resources Ltd., a development stage mineral exploration and oil and gas exploration company, engages in the identification, acquisition, evaluation, exploration, and development of mineral properties located in Canada, Papua New Guinea, and Uganda.

The company also invests and explores in oil and gas properties in Canada, the United States, Rwanda, Armenia and Kenya.

Papua New Guinea

Feni Islands Gold Project (owned 75% Vangold, 25% New Guinea Gold Corporation: The Feni Islands Gold Project (Feni) covers 166.6 square kilometres and includes both the Ambitle and Babase Islands that comprise the Feni Islands. Feni hosts a large gold system similar to the Lihir Gold Mine.

Pacific Kanon Gold Corporation: The company executed a share exchange agreement, in 2007, to exchange its 50% interest in Kanon Resources Ltd for a 45% interest in Pacific Kanon Gold Corporation. Kanon Resources Ltd. (Kanon) is a company registered in Papua New Guinea, and is a wholly-owned subsidiary of Pacific Kanon

Gold Corporation. Kanon holds 100% of four prospecting licenses and 80% of another, all of which are located in Papua New Guinea. Kanon Resources Ltd (Kanon) is the Papua New Guinea subsidiary of Pacific Kanon and holds title to five projects in Papua New Guinea, Mt Penck, Bismarck, Yup River, Allemata, and Fergusson.

Uganda: The company holds approximately 2,200 square kilometers in exploration licenses in Uganda that are grouped into six projects: Kafunjo, West Nile, Kilembe, Kamwenge, Fort Portal, and Bugiri.

Kafunjo Licences: The company holds three adjacent licences which are located in southwest Uganda near the triple junction of Tanzania, Rwanda, and Uganda.

Kilembe Licences: The company's five contiguous licences extend southwesterly from the formerly productive Kilembe Mines Ltd. copper – cobalt mine. The area covered by the Vangold licences includes the mineralized horizon.

West Nile Licences: Nine licences are positioned adjacent to the DRC – Uganda border. The company's land holdings in the West Nile district include 1,350 square kilometers.

Other Properties

Rossland Property: The Rossland properties situated in and around Rossland, B.C. comprise three principal groups: North Belt (including the gold mines Iron Colt, Evening Star and Georgia), South Belt (includes the lead/zinc Blue Bird-Mayflower mine and Homestake-Gopher gold mines) and Deer Park Hill.

Gallagher Gold Project: The company acquired by staking 24 contiguous unpatented mineral claims in White Pine County, Nevada, approximately 24 miles north of Ely, Nevada and 15 miles southeast of the Limousine Butte project. The company controls a 100% interest in the Gallagher Gold project.

Oil and Gas Properties

Deep Basin, Strachan Area, Alberta: The company entered into a farmout participation and agreement with an Alberta-based oil and gas company, to participate in the drilling, completing and equipping of a natural-gas test well in the Deep Basin of the Alberta Foothills.

Strachan Field, Alberta: The company entered into a farm-in agreement, in 2005, to drill

a test well in the Strachan Field located near Rocky Mountain House, Alberta.

East Corning, California: The company's wholly owned subsidiary, Corning Energy Inc. (Corning), a Nevada corporation, and its partners own interests in from nine producing wells in the East Corning gas field located near Red Bluff in Tehama County, California. Corning has a 3.75 % gross interest in the wells.

Kenya, Rwanda and Armenia: The company operates in Kenya, Rwanda, and Armenia. All of the three properties cover in total 43,000 sq kms.

Kenya: Vangold Kenya Ltd., wholly owned subsidiary of the company, has acquired an office in the Nairobi industrial area to provide technical support for operations in Kenya and Rwanda. In Kenya, the company has acquired a large [12,270 square kilometers] land package [Block 3A] which partly lies along the hydrocarbons fairway of Central Africa Rift system [CARS]. The Block 3A acreage occupies a convergence area of three sedimentary basins of Anza, Mochesa and Lamu Embayment.

Armenia: The company signed an exploration and production sharing contract with the Government of Armenia in 2007. The contract covers the areas designated 'Blocks 4, 5 and 6' and extends to 13,775 square kilometers in central and southern Armenia.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
