The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Vantage Drilling Company business.

About Vantage Drilling Company

Vantage Drilling Company, an international drilling company, focuses on operating a fleet of drilling units. The company's primary business is to contract drilling units, related equipment and work crews primarily on a dayrate basis to drill oil and natural gas wells for customers.

The company also provides construction supervision services for, and would operate and manage, drilling units owned by others. Through a fleet of nine owned and managed drilling units, the company provides offshore contract drilling services to national and independent oil and natural gas companies.

The company's fleet includes four ultra-premium jackup rigs, three ultra-deepwater drillships, and two deepwater semisubmersibles.

Drilling Fleet

Jackups: The design of The company's four jackup rigs is the Baker Marine Pacific Class 375. These units are with independent legs capable of drilling in up to 375 feet of water, a cantilever drilling floor, and a vertical drilling depth capacity of approximately 30,000 feet.

Drillships: Drillships are self-propelled, and suited for drilling in remote locations because of their mobility and large load carrying capacity. The drillships are designed for drilling in water depths of up to 12,000 feet, with a total vertical drilling depth capacity of up to 40,000 feet. The drillships' hull design has a variable deck load of approximately 20,000 tons and measures 781 feet long by 137 feet wide.

Semisubmersibles: The design of the two semisubmersibles that the company would manage is the Moss Maritime CS50 MkII. These drilling units are designed to be capable of operating in harsh environmental conditions. These semisubmersibles are designed for drilling in water depths of up to 10,000 feet, with a total vertical drilling depth capacity of up to 40,000 feet.

Markets

The company's jackup fleet is focused on the 'long-legged' (350+ ft) high specification market. The drillships and semisubmersibles that the company operates and have agreements to operate are focused on the deepwater and ultra-deepwater segments.

Customers

The company's customers are primarily large multinational oil and natural gas companies, government owned oil and natural gas companies and independent oil and natural gas producers. In 2009, its major customers were Pearl Oil (Thailand) Ltd., Seadragon Limited, and Foxtrot International LDC.

History

Vantage Drilling Company was founded in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
