Such information creates your awareness about principal trends of Vapor Corp. business.

About Vapor Corp.

Vapor Corp., a development stage company, designs, markets, and distributes personal vaporizers under the Fity-One, Krave, EZ Smoker, Smoke Star, and Green Puffer brands. Personal vaporizers are electronic devices that vaporize a liquid solution, which provide users an experience akin to smoking without actual combustion and as such no smoke or noxious odor is dispelled from the device. The company sells its personal vaporizers internationally and domestically through distributors, wholesalers and direct to consumers through its Web sites and direct response television marketing efforts.

Product

The company's personal vaporizers are electronic devices, the functional elements of which are integrated into a stainless steel shell, include a small plastic cartridge that contains an absorbent material that is moistened with a propylene glycol liquid solution, which may or may not contain, nicotine, tobacco flavoring or other flavor essences, an electronic airflow sensor, a heating element, referred to as the atomizer that vaporizes the liquid in the mouthpiece so that it can be inhaled, a rechargeable lithium-ion battery which powers the device and certain electronic components, such as a timed cutoff switch to prevent overheating, an LED to signal activation of the device and an external charger, to recharge the battery.

The company sells two and three piece, in addition to disposable personal vaporizers, the distinction between two and here piece personal vaporizers is the construct of the unit, the number of core parts and the performance and actual use of the device. The company also markets USB, home and car charging devices, in addition to varieties of cartridges with varying formulations, including zero nicotine with no flavoring, zero nicotine with tobacco and menthol flavors, in addition to the standard electronic cigarette filter which contains tobacco flavoring and varying degrees of nicotine. The company sells its products in a kit, or as separate components. It also offers for sale replacement cartridges to be used with its non-disposable personal vaporizer when the cartridges become depleted.

Competition

The company's competitors can be classified into three main categories: pharmaceutical companies, such as Glaxo SmithKline and Pfizer; tobacco companies, such as Phillip Morris, R. J. Reynolds, and Lorillard; and other personal vaporizer and electronic cigarette companies, such as Njoy, Smoking Everywhere, and Smoke Free Innotech.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
