The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Vector Ltd. business.

### **About Vector Ltd.**

Vector Limited operates as an energy infrastructure company in New Zealand. It owns and operates electricity distribution networks in Auckland City, Manukau City, and parts of the Papakura District under the 'Vector Electricity' brand name; and in the North Shore City, Waitakere City, and Rodney District under the 'UnitedNetworks' brand name. The company also operates a high pressure gas transportation system supplying major centers of the North Island, as well as lower pressure gas distribution networks in approximately 30 towns and cities; sells natural gas to gas retailers, electricity generators, petrochemical plants, and commercial and industrial customers; engages in wholesale and tolling of liquefied petroleum gas; and owns and operates gas processing facilities, as well as produces and sells propane and butane, natural gasoline, and carbon dioxide. In addition, Vector also provides electricity and gas metering services, as well as energy data management services; owns, operates, and wholesales open access fibre-optic broadband communications networks in Auckland and Wellington; and owns and operates wind turbines for electricity generation. Further, the company offers training for people working in the utilities sector; and provides professional arboriculture and vegetation management services. As of June 30, 2009, it provided electricity to approximately 523,394 consumers in Auckland and Wellington; natural gas to 149,516 customers in the North Island; liquefied petroleum gas to 23,000 customers in New Zealand; electricity and gas metering services to 810,000 homes and businesses in New Zealand; and metering data services to 15,000 customers in New

Zealand and Australia. The company was formerly known as Mercury Energy Limited and changed its name to Vector Limited in 1999. The company was founded in 1994 and is based in Auckland, New Zealand. Vector Limited is a subsidiary of Auckland Energy Consumer Trust.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
