Such information creates your awareness about principal trends of VERBUND AG business.

About VERBUND AG

VERBUND AG produces, transmits, trades, and sells electrical energy to power exchange users, traders, provincial energy companies, industrial enterprises, households, and commercial customers in Austria and other countries in Europe.

Divisions

Generation

The company operates as an electricity transporter. It operates 108 hydropower plants with a maximum combined output of approximately 6,000 megawatts and an average annual generation of approximately 22.8 billion kWh. VERBUND-Austrian Hydro Power AG is responsible for the management, maintenance, planning, and construction of hydropower installations. The company produces electricity in the thermal power sector. Through VERBUND-Austrian Thermal Power GmbH & Co KG, Verbund constructs and operates the caloric power plants with and without combined heat and power generation. The power plants of Durnrohr, Mellach, and Neudorf-Werndorf II offer a total electrical capacity of 815 MW.

The company, through VERBUND-Austrian Renewable Power GmbH, also operates 3

wind farms in Bruck an der Leitha, Hollern and Petronell-Carnuntum. The 25 wind turbines offers a total of 49 megawatts and produces environmentally sound and climate friendly electricity for 30,000 households.

Transmission

The company's electricity transmission takes place through the independent grid company VERBUND-Austrian Power Grid AG. It operates a high-voltage grid with voltage levels of 380, 220 and 110 kV. The company is responsible for operation, maintenance, planning, and expansion of the grid.

Trading

Trade is conducted through VERBUND-Austrian Power Trading AG, Verbund's international electricity trading company. VERBUND-Austrian Power Trading AG operates in 10 European countries via subsidiaries or joint ventures. It supplies the public services and major industrial clients.

Distribution

The company operates in the area of direct electricity sales on the deregulated Austrian market.

International

VERBUND-International offers services for both the group and foreign participating interests, focusing on the area of investment management, controlling and the development of investment projects. The company operates photovoltaic power plants in Spain.

History

The company was founded in 1947. It was formerly known as Osterreichische Elektrizitätswirtschafts-Aktiengesellschaft and changed its name to VERBUND AG in June 2010.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
